## DEDICATION

*A Pathfinder, a Guide, and a Friend*

DAVID S. B. PENNOCK, M.D., D.O.

WITH a profound feeling of gratitude and with an immeasurable sense of our privilege, the Class of 1935, as Juniors in the Philadelphia College of Osteopathy, hoping to pay, in this way, our tribute to you as an Osteopathic personality of the highest order, as a leader among physicians and surgeons, as an inspirational challenge to bring out the best in us, and as a friend with tireless efforts on behalf of his students, do dedicate this volume of the "Synopsis." To you, Dr. Pennock, all honor for your many years of service to humanity and for your undivided interests in promoting Osteopathy. To you, Dr. Pennock, our respect and sincere gratitude.

DAVID S. B. PENNOCK, M.D., D.O.

## THEME

INSPIRED by the indefatigable efforts and unfathomable past achievements of our predecessors who have so nobly portrayed the merits of an infallible science to us, we, the class of 1935, surreptitiously desirous of perpetuating the incalculable values to underclassmen and simultaneously renew increased loyalty of alumni, present this volume as a meagre emblem of what the greater Osteopathy shall attain.

### THE BUILDING FROM THE AIR

SINCE 1899, the growth of Osteopathy has been steady and sure in Philadelphia. This present structure was put into use in 1929 and already is taxed to the limit. It is situated in the residential section of West Philadelphia, amid pleasant surroundings. Passon Field is seen to the left of the college. The college and hospital units are so situated as to permit of an expansion program.

The architecture is Collegiate Gothic and is an outstanding example of that type. This presentation shows the building with its main entrance on Spruce Street, flanked by towers, opening into a large lobby connecting the College and Hospital units. The combination of an osteopathic college and a hospital is the ideal arrangement for correlation of training.

This beehive of activity is but a symbol of the advances Osteopathy is making, and signifies the greater things in the future.

The hospital was chartered May 10, 1911, as a corporation with no stock and is not conducted for profit making.

### COLLEGE AUDITORIUM

THIS is the daily scene of active students. The auditorium is located on Forty-Eighth Street and leads directly into the main corridor of the first floor. The library is on the left and the auditorium with a seating capacity of 500 is situated on the right. The entrance to the General Clinic is found just to the right of the entrance. The college was founded January 27, 1899.

Formerly the college has been located in the Stephen Girard Building, 1901. In 1904 it was moved to the Witherspoon Building, and later to the northeast corner of Thirty-Third and Arch Streets. From 1906 to 1911 it was situated at 715 North Broad Street, when it was moved to 832 Pine Street. In 1916 a building to house the college was purchased at the southeast corner of Nineteenth and Spring Garden Streets. On November 16, 1929, this splendid new building was opened to classes.

Here the philosophy and teachings of Andrew Taylor Still, and the ideals and traditions of the founders, Drs. O. J. Snyder and Mason W. Pressly, have been maintained by teachers of national reputation as O. J. Snyder, Muttart, Flack, Balbirnie, Pennock, Dufur, Nicholl, E. G. Drew, Galbreath, Ira W. Drew, and others.

Here is the heart of collegiate activities. Examinations, special lectures, demonstrations, and dances are held here.

### THE SURGICAL AMPHITHEATRE

WE FEEL a note of seriousness as we reflect upon the shrine of the skillful surgeon. It is here that many lives have been preserved and born. No one thing has been spared in the successful endeavor that has made this room a complete unit, even to the most minor detail; everything for the surgeon to better aid in the result. Through certainty and dexterity of his capable hands in conjunction with the wisdom acquired through long years of practice and training the surgeon works toward the alleviation of pain.

Above him, arranged in graded tiers, the students whose privilege it is to watch, and to observe the technique and principles of surgery that they have been taught. The Amphitheatre will seat two hundred and fifty observers, each of whom has an unobstructed view of the procedures below.

### THE COLLEGE CLINIC

UPON qualifying for clinic practice, it is here that the student physician prepares himself for his career of service. He is sent into a small world of practice where under the guidance of superiors, it is his privilege to meet his own patients, to render such service as he may, and to prove to himself his own ability or his own shortcomings as a practising physician, and to learn by doing and by seeing, the things which have never been put into books. Then, having completed his course of study, he may go on into a practice less strange for having already had an introduction to a few of its many problems.

At the present time there are thirty-seven treating rooms each equipped for osteopathic treatments. In these rooms well in advance of forty thousand treatments are given yearly. There are also special Clinics in the organization consisting of the departments of Neurology, Surgery, Physical-Therapy, Mental Hygiene, Pediatrics, Cardio-Respiratory, Endocrinology, Dermatology, Proctology, Gastro-Enterology, Obstetrics and Gynecology, Eye, Ear, Nose, and Throat, and Podiatry.

## GREETINGS TO THE CLASS OF 1934

**I**N SOME respects it is doubtful whether matters pertaining to economics, jurisprudence, ethics and other political and social aspects of public life are sufficiently stressed in the instruction programs of our undergraduate schools. This observation is made in the light of changed conditions known to exist in the affairs of the world in general. Question has been raised whether we may expect a flat return to the normal that we enjoyed prior to the World War, or if the departures noted should be taken as more or less stable and conforming factors of a new order.

With the spirit and temperament of the public at large, taxed and strained to unusual proportion, it is fitting for young people about to venture into the thick of such disquietude, for the purpose of making a living, especially those of distinctive professional capacity, to consider well the commonplace issues confronting the public and to be duly observant of the pulse and stride of the people in general whom they will seek to serve.

In the conduct of your practices particularly in these perplexing times, it is imperative that the spirit of human kindness and courtesy prevail. You are likely aware that most of our physicians today are serving and carrying along patients and families with vague expectancy as to benefit or recompense. Stated rates have been tossed to the winds in the face of losses and misfortune. You, too, will likely be forced to apply the humanitarian principle to some of your individual endeavors.

It may be necessary to develop in the code of ethics among those caring for the sick an unprecedented degree of tolerance and a spirit of compassion toward the caste who, though shunning charitable share, seek the charity of kindness and concession until return of better estate. Yet this does not suggest that in the economic balance of your affairs you should not set about to maintain your offices in dignified mien, just as others do in the conduct of business, with a proper measure of resolution and firmness in the matter of charging fees and in the exaction of payments. If anything, at the time of entering practice, the humanitarian principle overdone would appear far worse than the operation of the cold maxims of business enterprise.

With respect to jurisprudence and the rights and privileges of practice in the several states, it is essential that each individual acquaint himself fully with the established laws and regulations pertaining to his particular state, district or community. In this connection the oft-expressed wisdom of joining the organized societies and associations of our profession may be reiterated. The interpretation of laws, questions involving the rights or restrictions contained in acts, provisions, ordinances, and the like, become the problems and issues of chartered groups and their counsellors. A lone wolf, a poor economist set on saving the mere dollars of society or organization dues, is constantly faced with grief and adversity. The healthiest way to avoid contest and litigation is to "Obey the Law" while subscribing to the privileges of membership in national and state associations.

*Sigma Phi Epsilon**Iota Tau Sigma*

Central High School, Philadelphia

A.B., University of Pennsylvania, 1916

D.O., Philadelphia College of Osteopathy, 1922

Dr. Holden entered the Philadelphia College of Osteopathy as director of the Department of Biologic Sciences. Then came the Great War, and, with others, Dr. Holden answered the call, serving as Sergeant-Major in the 538th Engineers, A. E. F. At the close of the war he returned and received his degree in Osteopathy in 1922. Dr. Holden, in 1924, was elected Dean of the College and shortly thereafter assumed the Superintendency of the Hospital. During his administration the new building program was inaugurated and osteopathy as a profession made strides in Philadelphia greater than ever before. Under his leadership many educational advances are to be noted, with higher academic requirements instituted, faculty and student numbers augmented and with inter-departmental correlation to insure broadened scope into post-graduate and research fields. Dr. Holden serves as Treasurer of both institutions and as a member of the Board of Directors. In addition to these major duties locally, he holds the office of Chairman of the Bureau of Hospitals of the American Osteopathic Association.

## GREETINGS TO THE CLASS OF 1934

*(Continued from Page 18)*

As for ethical considerations, it may be said that is doubly necessary for osteopathic physicians to live up to the spirit as well as to the letter of accepted traditions and practices. There can be no questionable, nor even borderline, tactic or artifice resorted to, but what may embarrass or damage the name or reputability of this distinctive branch of the healing art. There can be no such thing as a shutting of the eye to right or responsibility. A single impeachment stands to seriously impair or even to destroy this splendid new school of thought. It becomes the duty of each of us to carry ourselves beyond reproach in all things in our lives as osteopathic physicians.

EDGAR O. HOLDEN,  
*Dean.*

## In Memoriam

BRUCE FINDLEY THOMAS, D.O.

Born—May 7, 1907

Graduated—June 6, 1929

Died—July 19, 1933

## ALUMNI ASSOCIATION

THIS association of the graduates of the College was organized with the express objects "to promote the interests and prosperity of the Philadelphia College of Osteopathy, to encourage a high standard of osteopathic education, to perpetuate college memories, to offer prizes, to provide funds for chairs and laboratories and endow beds in the Osteopathic Hospital, to cultivate and maintain good feeling among the graduates and to advance the interests of sound osteopathic knowledge." Membership in the association is open to any graduate of the College in good professional standing. More than six hundred members are enrolled at this time. The Annual Reunion is held during Commencement week.

Donaldson High School, Pennington Prep.

HENRY N. HILLARD

*Phi Sigma Gamma*

Neo Honor Society; Bacteriological Society; Baseball, 1, 2, 3, Captain, 4; Manager of Tennis, 4; Synopsis Business Manager, 1934; Class Treasurer, 3; Freshman Formal Committee; Sophomore Dance Committee.

Lancaster High School, Franklin and Marshall College.

KIRK LOVELAND HILLIARD

*Theta Psi*

Gastroenterological Society; Bowling, 1, 2, 3, Manager, 3; Interfraternity Basketball and Baseball; Interclass Baseball.

Pleasantville High School, N. J.

GORDON R. HORNBECK

*Atlas Club*

Basketball, 2, 3.

Poughkeepsie High School, Colgate University.

WILLIAM DAVID HILTON

*Theta Psi*

Track, 2; Interfraternity Track, 3; Orchestra, 2; Interfraternity Council; Junior Prom Committee.

Lincoln High School, Jersey City, N. J.

HORATIO NELSON HAVER IRWIN

*Theta Psi*

SYNOPSIS Staff, 1933; Interclass Swimming.

Peddie, Columbia School, Fordham University.

WILLIAM LUCIUS HITCHCOCK

*Phi Sigma Gamma*

Obstetrical Society; Interclass Basketball; Bowling; Interfraternity Council; Student Council, 4.

Deposit High School, Riverdale Country School, Hartwick College.

HENRY GODFREY KING

St. George's School, England; Hull Technical College, Guy's Hospital Medical School, London; Red Thorne, Ferriby, East Yorks, England.

J. MARSHALL HOAG

Cardio-Vascular Society; Gastroenterological Society; Junior Prom Committee.

George Washington High School, N. Y.

OSKAR KNODT

Gymnasium, Germany; University of Saskatchewan, Canada, A.B.; National College of Chiropractic, Lindlahr College of Naturopathy, Chicago.

MAYOLA BERNICE KNON

*Axis Club*

Classical and Commercial High School, Worcester, Mass.

ERNEST L. MARKEY

*Phi Sigma Gamma*

Basketball Manager, 2; Interclass Basketball; Interfraternity Basketball; *Exoner*, 2, 3, 4.  
York High School, Dickinson Seminary, Williamsport, Pa.

MORRIS KRAMER

Neurological Society, Treasurer.

Temple University, Philadelphia College of Pharmacy and Science, Ph.G.

LEO LINCOLN MARTIN

*Iota Tau Sigma*

Athletic Association, Secretary; Newman Club; Junior Prom Committee; Freshman Formal Committee; Interclass Baseball and Basketball; *Exoner* Representative Athletic Association; Interfraternity Basketball.  
Columbia High School, Pa., Franklin and Marshall College.

MILAN KUNA

Track, 1, 2, 3, 4; Basketball, 1, 2, 3, 4.

South Side High School, Newark, Upsala College, N. J.

GERARD M. MILLER

*Theta Psi*

SYNOPSIS, 1933, artist.  
Rollins College.

SYLVESTER J. KUPP

Passaic High School.

EDWIN E. MORSE

*Phi Sigma Gamma*

Gastroenterological Society; Obstetrical Society; Track.  
Malden High School, Malden, Mass.

MAURICE ROBERT MURDOCK

Interclass Swimming, 2, 3.

Prescott Collegiate High School, Ont.

FRANK FERDINAND POGLITSCH

Neurological Society.

New Britain High School, First  
National University of Naturopathy,  
N. D.

THEODORE C. NEWMAN

*Phi Sigma Gamma*Neurological Society; Gastroentero-  
logical Society; Cardio-Vascular Society  
President; Obstetrical Society; Physio-  
logical Chemistry Society; Bowling, 2,  
3; *Axone*, 2, 3.

New York Preparatory School, L. I.

WILLIAM A. POHLIG, JR.

*Phi Sigma Gamma*Cardio-Vascular Society; Gastro-  
enterological Society.

Paulsboro High School, N. J.

GEORGE F. NIKOLA

*Atlas Club*Neurone Society President; Neo  
Honor Society; Basketball, 1, 2, 3, 4,  
Captain, 4; Tennis, 1, 2, 3, 4, Captain, 4.  
Spring Valley High School, Brown  
University.

JOSEPH RONALD A. PORIAS

Orchestra, 1, 2, 3, 4; SYNOPSIS, 1933,  
Photographic Editor.Johnstown High School, Borough  
Hall Academy, City College of New  
York.

NATHANIEL C. OSTROFF

Swimming Team.

Northeast High School.

ROY ARTHUR RUCH

Albany High School, N. Y.

MELVIN JOSEPH SCHUBERT

President, Neurological Society, Physiological Chemistry Society; Obstetrical Society; Cardio-Vascular Society; Freshman Formal Committee; Interclass Basketball.

Steele High School, Dayton, Ohio; Tri State College, Indiana.

STEWART P. SMITH

*Atlas Club*

Interfraternity Basketball and Baseball; Interclass Basketball.

Skaneateles High School, N. Y.

LEWIS A. SELISKER

*Lambda Omicron Gamma*

Interfraternity Basketball and Baseball; Interclass Basketball.

University of Pennsylvania, St. Joseph's College.

JULIUS SOBEL

*Lambda Omicron Gamma*

Interfraternity Baseball.

West Philadelphia High School, Philadelphia College of Pharmacy and Science, Phila., Villanova.

LOUIS SIGAL

SYNOPSIS, 1933, Advertising Manager.

Upsala College.

HARRY ARNOLD STREET

*Phi Sigma Gamma*

Obstetrical Society.

Southampton High School, N. Y.

FORTUNATO C. SINAGRA

*Phi Sigma Gamma*

Obstetrical Society; Newman Club; Symphony Orchestra, 2, 3, 4, Manager, Swimming, 2, 3, 4.

Atlantic City High School, New Jersey (College of Commerce).

JOHN ALLAN SWEET

*Phi Sigma Gamma*

Obstetrical Society.

Rogers High School, Newport, R. I.; Bliss Electrical School, Washington.

ALINE SWIFT

*Axis Club*

Stevens High School, Lancaster, Pa.

KENNETH L. WHEELER

*Atlas Club*

Baseball, 2, 3, 4; Golf, 2, 3, 4; Bowling, 2, 3, 4.

Frankford High School, Hahnemann.

FRANK LOUIS COSTELLO

*Theta Psi*

Newman Club; Rhode Island Club.

Technical High School, B. and S. Business College, Providence.

## SENIOR HISTORY

IN SEPTEMBER, 1930, one hundred and thirty of us, more or less, started out to prepare ourselves to be osteopathic physicians. We all remember well the welcoming addresses given at the meeting on the first evening. But we all remember more vividly, the first days, when everyone connived to baffle us with such difficult directions as dorsal, anterior, medial, lateral, internal, etc.; and the mysterious tubercles on bones; and all kinds of deep theories and definitions concerning life and cells and how they eat and sleep and metabolize (another word which caused us great anxiety), and all about their sex life, and so forth. Many of us studied far into the night, attempting to get these fundamentals straightened out; others would give up when only part way through an assignment and go to bed to be tormented all night by gruesome things like chemistry symbols which would build up to quite terrifying lengths, with Professor Erb and Mr. Stoertz standing beside them laughing heartlessly as they pondered and sweated over the cursed things. Some of the girls probably cried over the same assignments and for a while imagined how much more desirable it would be to stay at home and be useless, and not have to do anything more difficult than embroider and dance and dress up and have someone else look after them. Still others took things lightly, drowning the few worries that might threaten them occasionally, with—well, never mind.

Everyone finally became more or less adjusted to this new life before long and learned to do anatomy lessons in less than six or eight hours; some even learned to do whole courses on the night before the midyear exam—we won't tell how successful these folks were.

When the Christmas entertainment came along, we found that we had only one talented member in our class, but he "did his job up brown" with his fur coat; and Joe Porias, of course, realizing the exquisite technique of our song bird, stood close by to collect.

We will all recall the success of our Freshman Dance at the Adelphia Hotel, with Doc Dougherty's orchestra.

After feeling we were being imposed upon by upper classmen when they offered themselves as temporary officers for our class government, we asserted ourselves by electing Newton C. Allen as President, C. M. Becker as Vice-President, Martha M. Bailey, Secretary, and Beverly Sparling as Treasurer.

However, we soon replaced these officers with others—Dr. Becker becoming

president of the class and remaining in this office throughout the remaining years here. Johnny Finn was chosen for Vice-President, Mary Elizabeth Bailey as Secretary, and Si Green for Treasurer. We entered our sophomore year with a much finer governing body. We find that the seventeen girls who entered in the freshman year with us had dropped considerably in number. Work became more difficult and everyone showered examinations upon us until we were almost completely worn out, but June came around just in time that year to save us from insanity.

Or, perhaps it didn't save us. Sometimes we behaved very much like lunatics. But it was the fault of the Seniors that we did some of the things we did. The Senior-Sophomore Fend, consisting of kidnapping someone from the opposing faction, continued until the casualty of the broken glass in the sophomore door. After this we calmed down somewhat and left the seniors alone, confining our tactics to our own classroom. And the only fun we had after that consisted of throwing lighted torches or waste baskets or chairs, etc. Recalling that year, we marvel that any of us have acquired any kind of a professional manner at all.

The Junior year opened with many new experiences in store for all of us—such things as Obs. cases, societies of all kinds, clinics, Junior internship, the year book, the Junior Prom, and many other things. This was indeed a very full year and one to remember with pleasure. We began to learn something beside fundamental courses and everything that we felt we had come here for, began to open up before us.

Obstetrical work became extremely interesting to many of us and the opportunities opened to us in this line were very inviting. I believe we owe Dr. Evans a great deal of appreciation for the splendid opportunities held forth to those who are interested in these cases.

This was an extremely busy year and all our time was consumed with writing theses or examination papers for entrance into the various societies, or writing for the year book, or having our pictures taken, not to mention the task of running the Junior Prom. The latter was a financial success and this enabled us to have several good times in our senior year.

We especially remember the Pediatrics Clinic for the unique happenings which it brought—ask Harry Street, and others. Clinic exams, too, taught a thing or two; we learned that at this stage of the game, we should know “everything,” just in case someone happened to ask something we hadn't been taught. If some day, in years to come, you should find that you have forgotten the word “Cardioarthropathy” and with what it was associated, you will know that you are really getting old (if your memory can fail you to this extent).

We had quite a time choosing our class officers for the senior year and in spite of

all the conspiring and campaigning, the elections ended with no ill-will on anyone's part. And Becker continued to be Class President, Si Green, Vice-President, Mary Elizabeth Bailey, Secretary, Steve Walker as Treasurer, and William Hitchcock as Student Council Representative.

With the Senior year came student internship in the hospital, and clinic work continued. Everyone began to make himself conspicuous to the "powers" in this institution if he wanted to find himself with a resident internship when he graduated. About forty-five of us competed for these cherished seven residencies. The long awaited announcements came on March 14th and found Griese, Frey, Blackstone, Hoag, Beckman, Morse, and Hitchcock as regulars with M. M. Bailey and Gallagher as alternates.

In the fall, Dr. Drew invited all of us to spend the day at his place near New Hope. This day will stand out as one of the very best times we have ever had, I am sure. Very recklessly, all the "boys" entered into a football game; the next day about seventy "old men" limped into class. But it was worth a few crippled days to have had this wonderful outing. We owe Stan a vote of thanks for preparing the barbecues and coffee. And the beer was very good, too.

This year, airplanes have been in vogue and the later a professor shows up, the more congested becomes the aerial traffic in the senior room. The prize for the most peculiar model goes to Henry Hillard; he made one with many dog-eared attachments and he couldn't lose it—it wouldn't go that far.

The Charity Ball has been the outstanding event so far, this year, and I don't believe anything will surpass it. We all agree that the entertainment was excellent and the music,—well, it could not be improved upon in any way. If our Charity Balls continue to be so much more wonderful each year, there is no prophesying what we will attain in a few years from now. Dr. D'Eliscu is another person whom we will never forget and who should be included in this history of our class.

Such a history should include many, many more people who have made it possible for us to reach this senior year. We feel that we cannot adequately express our feelings toward the staff of the college and hospital, those who have inspired us to carry on the great work which they have given to us.

---

# THE JUNIORS

---

ALLEN, BLANCHE

● Surrounded by a cloak of New England conventionalism, Blanche has advanced through college building an enviable scholastic record. Penetrating a superficial reserve, you will find a thoroughly likeable, cultured, and intelligent young woman with singing ability and athletic attainments. She is a profound student in French and History, having acquired training at Mount Holyoke, University of Cincinnati, and Paris.

ALVAREZ, VINCENT

● The I. T. S. fraternity gained an asset in 1930, and our class in particular in 1933, when Vince became our heritage. With his conscientious work he has proven his value in all things, especially in Synopsis, Axone and Bacteriological work. A pleasing personality has made its way into the heart of the class completely and rapidly. He has outside interests in real estate transactions.

ANDREWS, HAZEL

● Hazel, friendly and likeable, comes to us from Painted Post, New York, where she received her preliminary education. Hazel, although the youngest girl in the class, is by no means the least aggressive as shown by her interest in Pediatrics. She is an important member of the Lumsden-Boivie-Andrews trio — the nucleus of Kappa Psi Delta.

*A disturbed artery marks the beginning to an hour and a minute when disease begins to sow its seeds of destruction.*

ANTRY, ADELE

● Adele is "Jack of all trades and master of all." She is a musician, an artist, designer, and even a mechanic—for she can repair damaged automobiles. Her special interest, at present, appears to lie in Obstetrics. When Adele's smile appears and her eyes dance with good humor, no one can hide his own smile. Dependability and loyalty—her valuable assets.

BACHMAN, ROBERT

● Every day the Elevated rumbles in from Torresdale Avenue with Bob on board. Every day Bob picks up a new friend by his smiling agreeableness and witty remarks. At school, he is seen usually with Clem. The back row is his favorite haunt, baseball his favorite sport, New England pronunciations a favorite topic of conversation, and Phi Sigma Gamma his fraternity.

BATES, ROSWELL

● Ross is a pleasant, unassuming chap with the ability and willingness to undertake a given task as shown by his efforts as our Editor-in-Chief. Ross is deeply interested in everything osteopathic and may later delve into specialization as a Pediatrician. He supports everything wholeheartedly which he believes in, and his very contagious smile has won him a host of friends here and in Danvers, Mass.

*The rule of the artery is absolute, universal, and it must be unobstructed, or disease will result.*

BERLIN, F. JOSEPH

● F. J. is an authority on Wilmington and proud of the fact. This level-headed classmate, with a pharmaceutical background, has adapted himself well to the profession chosen after realizing the futility of drug-store work. We defy anyone to win an argument from Joe once he starts with logical scientific facts. His hobby is acting the part of a detective.

BLACK, C. HOWARD

● Western Pennsylvania produces men who are sturdy in mind and body. The University of Pittsburgh sent this man into the great science of Osteopathy. Black's personality is deep and penetrating to all those who know him, either as an acquaintance or as a dear friend. Howie is quiet and deep thinking, and enjoys clean fun, his fraternity, and social life.

BOIVIE, MILDRED

● Millie may appear quiet and timid to those who do not know her well, but to her friends she is full of fun, having a dry sense of humor that keeps one in good cheer. Her name has suffered many changes of pronunciation in the class roll call. Her chief interest centers in work with children's diseases. Horse-back riding is her favorite sport.

*All nerves depend wholly upon the arterial system for their qualities such as sensation, nutrition, and motion.*

BONHAM, PAUL

BONIER, HARRY

BRODKIN, MITCHELL

● For detailed information concerning Paul we refer you to a charming Mrs. Bonham, Paul's helpmate and source of encouragement. His background is thoroughly Osteopathic and he will be a credit to the other Osteopaths in his family. His stability of mind, steadfastness, and geniality are only a few reasons why he is Vice-President of the class.

● Bonier is one of those quiet, peaceful individuals who brings you to your knees with a friendly slap on the back. His knowledge of control force should make treating a pleasant pastime. Harry is industrious, has an active interest in class affairs and in the profession. His sport indulgence is bucking and blocking traffic on the main route to and from Chester.

● Mitch is dependability personified. He and Paul Murphy are mainly responsible for the introduction of the new note system. He is another of the pharmacists in the Class of 1935. Quiet and serious in his endeavors, Mitch has met with success in his studies, in his fraternity life, and as a member of the Junior Prom Committee.

*The body of man is God's drug store, and has in it all liquids, drugs, oils, opiates, acids, which God thinks necessary for human health.*

BURROWS, CHARLES

● Charlie is the originator of most of the present-day wisecracks. His humor is unique, his choice of the fairer sex commendable, and his ability as a golfer the envy of every instructor. Of his merits we could write much. Regardless of how difficult the task may be, Charlie constantly wears that smile which says, "Easy, one hand—give me another."

BUTTERWORTH, CRAWFORD

● Persistency has carried many men to that invisible Top. Although handicapped by illness in his Sophomore year, Crawford has come through in a commendable manner. We predict that the clinic will assist him in developing into a skillful technician. He is one of those chaps conscientiously performing his daily assignments well. He is a master at the art of studying.

CARLIN, ELIZABETH

● A more constant friend than Packy is difficult to find. She came to us from Cedar Crest College determined to become one of the best Osteopathic students. At present, her achievements center about the study of Pathology. She has a peculiar affinity for Essex cars, the Democratic party and Katherine Hepburn. As class secretary, she has proven herself capable and trustworthy.

*On this system of healing I have founded a natural system of midwifery which puts to shame any method which has heretofore been used—really abused.*

CHISHOLM, GILMORE

CLOUGH, REGINALD

COLE, GLEN

● Gil attended Wilbraham Academy, Mass., and descended upon Philadelphia with a sound mind supported by broad shoulders, characteristic of strength of mind and body. He is a fraternity man and known always to be dressed immaculately. His friends are many, extending over large areas and each one will forever support him in his work.

● The symptoms of this versatile personality are at variance with any logical conclusion, except that he is an extremely pleasant malady to have around. He first came into prominence at Boston University, is virulent as to wit and argument, and has weakness for l-o-n-g stories. He showed capable executive ability as chairman of the Junior Prom Committee.

● Glen is a quiet, diplomatic worker for the best interest of the class and college. For two years, Glen has held the class presidency, and is president of his fraternity, the Atlas Club, as well. Your personal problems will receive confidential consideration and find their way to proper authority through Glen. He is a logical thinker, a conscientious worker, and possesses professional personality.

*After the heart receives the blood, it sends it on to the brain, possibly to take on knowledge.*

*Of the contents of the skull, one ounce is used for thought, the remainder generates power for nerves.*

CRESPI, LEO

● A smiling, outwardly "happy-go-lucky" chap, but one who takes his work seriously, Leo does not boast of his ability as a technician, but those of us who know him well can look with approval on his progress. The neighborhood movies furnish his chief form of diversion. In clinic, Leo handles his patients in a professional and effective manner.

DAWSON, JOHN H. A.

● Jack is the Canadian representative in the class and we wish there were others in Canada like him who would be listed in the category of our intimate friends, and as future Osteopathic physicians. His is a keen, probing, observant mind, with enough joviality to endear him to those who come in contact with him. He is interested in extra-curricular activities.

DONOHOE, WILLIAM EDWARD

● A stout, jovial chap joined our ranks this year, having received his foundation at Villanova and Hahnemann Medical College. A former teacher, he is now being taught the great Osteopathic concept. Outstanding is his keen sense of humor with a proper amount of conscientiousness. Bill swelled our ranks with 265 pounds, but easily found a place with us.

*God's intelligence is immeasurable, and there is much evidence that knowledge is imparted to the corpuscle of the blood before it does its work.*

EDDY, CLEM

EVANS, DAVID J.

FARQUHAR, RALPH

● Clem is quiet in his manner and only a selected few can claim a speaking acquaintanceship with him. Early in his course, there developed a Damon and Pythias friendship between him and Bachman, a fraternity brother. Before entering Osteopathy, Clem attended the University of Virginia. His outside interests center about Phi Sigma Gamma, Bridge and Pinochle, and professional wrestling matches.

● All credit to Dave. Backed by preparation at Springfield College, a true determination, an agreeable aggressiveness, an Osteopathic mind, self-confidence, and a delightful wife, there is no hesitation in placing him as one of the class leaders. Australia is his home and he contemplates returning there to practice. He is a capable Student Council representative.

● Ralph, previous to matriculating at Philadelphia College of Osteopathy, was a student at Western Reserve—and more than that we know him to have been quite a wrestler there. Socially and professionally, Ralph rates near the top. He must have definite proof of all the statements made in class before he will accept them. He deserves much credit for his work in the hospital office.

*Every corpuscle goes, like a man in the army—who has full instructions where to go, and with unerring precision it does its work.*

FREY, HENRY

● Hank, from Princeton, is broad-minded, well read, and always willing to lend a helpful hand to anyone in need. He diligently attacks all duties set before him. As a Freshman, he displayed his athletic ability with the basketball team and last year served as class treasurer. We look upon him with great esteem. He is active in fraternal affairs.

GANZEMULLER, ALBERT

● Al is a "big man" physically in the class, and this height of his is even more noticeable when in Kelly's Austin. Al's hobbies are keeping his hair in approved shape, playing a fine game of tennis, and displaying his ability as an artist. His self-assurance and ability to put himself across at all times is the envy of many of us.

GARY, LESTER

● This blond, well-liked young man hails from Buffalo. "Swede" is especially keen in grasping material with least effort. He easily holds the class sleeping record, but more than makes up for lost time when awake. He has transferred his living quarters now from the Atlas Club to Norristown. The reason—a happy marriage.

*If the supply channels of the body be obstructed, and the life giving currents do not reach their destination full freighted with health corpuscles, then disease sets in.*

GELL, DOROTHY

GOLDBERG, LOUIS

GOLDEN, ABRAHAM

● Perhaps Dorothy may be considered one of the most practical individuals of the Junior Class. As one listens to her slow, concise recitations, one is impressed with the assurance and absolute correctness of her decisions, for Dot believes in quality rather than quantity. It is interesting to note her face light up as she speaks and to watch her eyes talk.

● Lou is a New York University man with a well-earned reputation. Difficult to interpret, his friendship, once made, is of the enduring type. Daily contact with men with whom he became well acquainted, and the magnetism imparted to his nature from a professional brotherhood seems to have changed him. He possesses a wide collection of complete notes, which is an indication of his conscientiousness.

● Profound and erudite is our classmate Abe. Abe is the other half of the duet from Wilmington. He is an outstanding figure in the lunch-time arguments of the Junior class conclave and proves himself a hard person to trip up on any subject from Neurology to Female Psychology. Concentration, straightforwardness and eagerness of purpose, seem an integral part of Abe's character.

*When an allopath gave me castor oil, he would ask God to bless the means used for my recovery.*

HANDY, CHESTER

● Worcester and Clark University sent this versatile young man, who on many occasions has kept a meeting from growing dull by his ability as a pianist. He has been very instrumental, in conjunction with Dr. Long, in organizing the college Symphony Orchestra and Glee Club. Drama and literature occupy much of Chet's time. He maintains a worthy scholastic record.

HEINEMEYER, THEODORE

● We all envy a man who never seems to have a care in the world, a man who is forever good-natured and cheerful. Receiving his pre-Osteopathic training at Lehigh and at Moravian College, Heinemeyer opened the door of Osteopathy to be engulfed in its mysteries. We can depend on Ted to promote our class whenever opportunity affords.

HERRMAN, CHARLES

● This very likeable classmate of ours has spent most of his busy life in Germany and France. His ambition is to return to France and spread Osteopathy's good-will. His interest at present is centered in the Bacteriology Lab. Charlie is smiling all day (except during his noonday nap), and this smile with his broadening of viewpoints through new associations makes him a popular student.

*Osteopathy does not look upon a man as a criminal before God to be puked, purged, and made sick or crazy.*

INCABABIAN, EDITH

KING, NELSON

KNOX, CLIFFORD

● Edith left a teaching position in Wilmington to study Osteopathy at Philadelphia College of Osteopathy. Her academic life at the University of Pennsylvania and her previous profession have given her admirable qualifications. Edith is famous for her culinary triumphs. For information as to her hobbies we shall refer you to her sisters of the Axis Club. Persistency and determination are beneficial characteristics of this student.

● Massachusetts sends to Philadelphia College of Osteopathy another son, whom we believe well qualified to add his part to the realm of Osteopathy. Perhaps it won't be just Osteopathy, but Osteopathy plus X-Ray, as Nelson has been spending considerable time in the department of Radiology. He has exhibited talent in literary lines also. Nels makes contacts easily and has that something known as personality.

● A deep thinker, a philosopher, and a teacher were bound together in this man after attending Foxcroft Academy; College of Therapeutics; School of Naturopathy; then through the doors of Osteopathy to become known as Knox, the quiet student, whom we have come to know and like. He is inactive in athletics and fraternities, perhaps because of married life.

*Osteopathy is a science that analyzes man, and finds out that he partakes of Divine intelligence.*

KRAZINSKI, WILLIAM DANIEL

● Mahoney City to Penn State to Hahnemann to Osteopathy, until now we find Bill in his proper place in our midst. He is the lesser physical component of that pair of Bills, Donohoe and Krazinski. With his willingness to cooperate and his friendly spirit, he has now become an accepted Class of 1933 factor. Conscientiousness, especially in Clinical procedures, is a marked characteristic.

KURZ, THEODORE

● Ted became one of our illustrious classmates in the second year after attending Gettysburg College. He received a primary medical education from which he swung into our scope of study. Today he is one of the staunch supporters of our profession with great ambitions. By his attentive attitude he is storing away many details for future use.

LALLI, JOHN

● Philadelphia College of Osteopathy has musicians! However, not all musicians are members of the orchestra. One "would be" leader of Cab Calloway's orchestra is with us daily. During the summer he proves himself to be a capable salesman. This alert, wide-awake young man enjoys to speak fluently and possesses the qualities of an aspiring chemist. He particularly enjoys relating past collegiate events of his days at Amherst.

*God manifests himself in matter, motion, and mind—study well His manifestations.*

*You should know the cause of disease and be able to remove it.*

LEBOW, JACOB

● Jack comes to us as a disciple of Osteopathy after years spent in pharmaceutical work. His favorite topic of discussion is "my two boys." Jack has a good sense of humor which serves as a controlling force over rowdyism. His air of gravity, with a mind that works harder than his tongue and a knowledge born of observation, assures progress.

LENZ, FRED

● A New Englander in spirit and characteristics, Fred is noted for business-like administration, which is corroborated by this volume. His abilities as a tenor make him one of the famous 1935 quartet. He has a failing for cranking flivvers on cold mornings in order to get to school on time. Fred is broadminded and optimistic in his viewpoints.

LEONARD, MAURICE

● Maurice began his higher education at the State Teachers' College in Trenton where the art of Physical Education tried to engulf him. However, like Jonah, he escaped, and feeling the spirit call of Osteopathy knew that he had found his calling. We soon found him to be the personification of good fellowship as well as the possessor of an extremely likeable personality.

*When you know the difference between the normal and abnormal structure, you have learned the all-absorbing first question.*

LEVIN, ABRAHAM

## ABRAHAM M. LEVIN, A.B.

● A. was the first of the Levin Bros. Triumvirate, and was one who stood high in scholastic and fraternal matters. He was both a good fellow and a good student. Abe is one of the boys from Philadelphia and a genuine credit to the Quaker City. Temple University began the process of preparation of this embryo doctor, granted him his A.B., then sent him here. Aside from his studies, Abe has found time to prove his value along literary lines in the Axone. A pleasant manner endears him to his host of friends.

LEVIN, JACOB

## JACOB M. LEVIN, Ph.D.

● J. was the keystone of the Levin Bros. Triumvirate. A real go-getter, he worked his way through Pharmacy College before coming here. Although never known to cram, J. rated high in his studies and was always ready to help those less fortunate.

Difficult problems and cases intrigued him, especially those of women and children. With his geniality, perseverance, and ability, we feel sure that J. will be a success in his chosen profession.

LEVIN, SAMUEL

## SAMUEL L. LEVIN, Ph.D.

● S. was the oldest and the sustaining element of the Levin Bros. Triumvirate. He was a graduate pharmacist and one who made a point of doing everything well. Sam is an advocate of visual education, as can be proved by the fine pictures he takes of the operations during surgery clinic. He is quite versatile in that he is a Registered Pharmacist, a bookkeeper and stenographer, plays first violin in our Symphony Orchestra and an amateur Bibliophile. With his varied interests, he still finds time to be a student.

*An ignorant head and a heavy hand can bruise a kidney, spleen, gall duct, omentum, or some of the lymphatics.*

LEVINE, HARRY

● Harry has indeed won for himself the respect of his classmates because of the sincerity of his work. Any day he can be found after a meeting of the Junior Class showing the other members how technique should be done, or displaying his ability as a salesman. He particularly likes to show his command of a well-developed vocabulary.

LINDLEY, FRANKLIN

● Frank, from Denver, Colorado, with his suave manner, his wavy hair, and his intriguing smile, quickly became a popular member of our class. His chief interest seems to lie in the field of Obstetrics, judging from his current activities. His fraternity, Theta Psi, and the Glee Club do much to keep his extra-curricular hours from becoming boring.

LODGE, WILLIAM

● Bill is one of those chaps who does not fear to delve into the mysteries of his chosen profession. Typical of the youths of Steelton, Pa., his home town, he is an ardent worker and an enthusiastic football fan. He has traveled extensively over this continent. The combination of being mechanically inclined and a former pattern maker will undoubtedly be valuable assets.

*An intelligent head will soon learn that a soft hand and a gentle move is the head and hand that gets the desired result.*

LUMSDEN, JEANETTE

● Cultured and well poised is this young woman from Boston. Jeanette has served well the Kappa Psi Delta sorority as a capable and understanding president. She plays tennis well and has achieved no little fame in her rôle of an excellent cook. Bacteriology is one of her hobbies and she devotes much of her spare time in that Laboratory.

MACDONALD, CHARLES

● Quiet, easy going, likeable, he proves to be a favorite of us all. We don't see much of him and perhaps we don't know him as well as we should, but he shows his interest here at Philadelphia College of Osteopathy by his continued support of all activities. Mac is a native of Syracuse. He holds the class record for letter writing which proves his popularity.

MAXWELL, DEANE

● Deane has been a real student since his advent into the college as a Pre-O. He received his training at Dickinson before entering Philadelphia College of Osteopathy. Socially, he has been rather quiet, but only because his studies are more important. He has proven a capability in practical work. A well-established practice in Carbondale, Pa., working with his cousin, is his ambition.

*We find two large and complete systems of vessels, the rivers of life, whose duty is to convey material to all parts of the body.*

McCOLLUM, FRED

McCORKLE, JOHN

MINES, JULIAN

● Fred, being a little older than most of us, comes to Philadelphia College of Osteopathy well prepared to enter the profession of Osteopathy. He has encountered many trials and tribulations but has always managed to come out on top. Mac is quiet and reserved. Athletically, baseball and basketball hold his interest. He takes his work seriously, which always pays in the end.

● After spending four years at Muskingum College, Mac came to Philadelphia College of Osteopathy with a A.B. degree carefully tucked away in one corner of his suitcase. He is well known for the dry humor and puns characteristic of him. A quiet, easy-going chap, Mac is the type that we all like.

● This genial person has a dual personality. Not only is he a master musician and actor but one of the most Osteopathically minded men in our class. Jule is the exponent of the latest styles from New York. Possessed with a keen insight, a wealth of knowledge, and the ability to carry on has won him a host of admiring friends.

*The whole universe with its worlds, its men, its women, with all their forms of life were formulated by the mind of an unerring Architect.*

MINTZER, HARRY

● Harry is a student, a traveler, and a true friend. As a student he rates near the top of the class and has already set a new record for proficiency in Physiological Chemistry. As a traveler, he commutes daily from Woodlyane, N. J. Harry possesses a very contagious smile, a ready wit, an abundance of energy, and a keen sense of responsibility.

MOODIE, ANDREW

● Andy is a well-liked member of the class, quiet and somewhat reserved. But he not misled by his apparently quiet manner, for he is prone to play some pranks and look the very picture of innocence. Moody has been reared on Osteopathy. We predict that he will share quite a lot of his Dad's practice when he returns to Schenectady, N. Y.

MOORE, GEORGE

● Moore is one of the older members of the class. Therefore, there is less tendency to acts or pranks on his part which we might reveal. George is an earnest student, silently and steadily sailing through the waters of Osteopathy. We are sure George has sensed the value of Osteopathy although his Dad is a well-established medical doctor.

*He has placed all principles of motion and life, also all the remedies to be used in sickness inside of the human body.*

MOWRY, FRED

NEWMAN, ARTHUR

ORR, PARKER

● Fred just naturally happens to be a model man; not only is he of the football hero type but appears as a leader of men as well. Also, he is a tenor of note—yes, sweet notes. Fred will surmount any possible obstacles that may happen to come into his path which includes any floods that may wreck havoc with Johnstown, his home town.

● Art comes to us from Long Island and with a brother in the Senior Class seems determined to keep Osteopathy in the family. Boundless energy and diverse interests enable Art to get his work in about half the normal time. Always ready for action, he also plays the piano—it seems "Somebody Stole His Gal." He is the originator of "we know where you're going."

● Parker's background is the envy of us all. His education was received at Brown University and at McGill. At the latter school, he received his medical training. Poise, seriousness and efficiency combined in Parker, lead to a respect for his abilities. Although somewhat aloof and difficult to understand, he can, at times, be one of the congenial men of the class.

*Let us not be governed today by what we did yesterday, nor tomorrow—by what we do today. Day by day we must show progress.*

PECK, ELIZABETH

● Pecky, our secretary, with her wealth of good humor, tact, thoughtfulness and kindness, is certainly one of the best liked individuals of our class, and perhaps her greatest pleasure lies in "just being nice." When things go wrong—or someone is needed—or something should be done—ask Pecky! She'll find a way. Betty manages to tolerate her ceaseless tormentors good-naturally.

PLATT, MAX

● Max has been a guiding light ever since his entrance into Philadelphia College of Osteopathy and not a few students have him to thank for his painstaking explanations of vexing problems. He has been a moderator for his more boisterous fraternity brothers at Lambda Omicron Gamma. His hobbies seem to be long walks and the utilization of leisure time for studying.

POWELL, ROBERT

● Amiable, calm, and reserved, Bob is one of our likeable classmates. This youth is of Osteopathic heritage. His prominence in fraternal circles will undoubtedly be projected into the welfare of future Osteopathic organizations. His willingness to lend a helping hand to anyone at anytime, plus his loyal friendship to those with whom he comes in contact produces a personality coveted by all.

*At the head of our column we carry the flag of progress, and should honor it with greater results by better application of the principles of Osteopathy.*

PRATT, WARREN

● Warren, a comparative newcomer to our ranks, is a pleasant chap of cheerful dispositions, whom we might classify as one of the group constituting the solid, dependable element of the class. His temperament is not of the dramatic type, but rather follows along a more even plane of endeavor, which is always consistent with progress in any field.

PRESCOTT, WILLIAM

● Bill has one of the best minds in the class for applying knowledge, which may be due to his Osteopathic family history or to his education at Syracuse University. Wherever he is, he lends an atmosphere of dignity and professionalism—as president of the class, our Freshman year or as a prominent baritone on the concert stage.

ROWE, DANA

● There is no school quite so complete as P. C. O. and no fraternity quite so fine as Atlas—ask Dana. And his friends like and admire his very staunch support. His patients will soon discover him to be a truly fine “good fellow.” We are often favored with a comedy act when Dana and Wilson are in the mood to ride each other.

*Ever remember that the word “perfect” means no more or no less than the fiat of God, that His work has been concluded with absolute exactness.*

SCHMIDT, IDA

● Ida is an excellent scholar in all branches of Osteopathy. She is ever ready to offer and to give help to anyone. Her hobby is a staunch championship of the oppressed and the victims of ridicule. A special interest in deep sea fishing and in Franklin automobile is hers. Her accomplishments in summer clinics and Chemistry are definite assets to anyone.

SOUTHARD, ROBERT

● We are taught that "normal function depends upon normal structure." Bob learned the art of normal structure by spending two years at Antioch College, where he started the study of engineering. At P. C. O., with that background, he has had the opportunity of successfully studying the normal structure of the human body. Bob is prominent in literary work and social affairs of the class.

STEPHENS, MERLYN

● He is one of the few who has successfully struggled through many hardships and overcame many obstacles which are entirely unknown to most of us. Acquiring an education from Carnegie Tech gives evidence for his firmness of mind. In "his estimation" he attempts at all times to aid his fellow students. Steve's devoted wife is a constant source of inspiration to him.

*Nature stands fully armed and equipped, and more than willing to execute all duties devolving upon her.*

STREICKER, WALTER

THOME, ROSCOE

TOMAJAN, K. GEORGE

● Kelly, as most of us know him is one of the most energetic men of the class. As far as athletic achievement is concerned, he is on top. This "New Yorker" delights in a keen competitor on the opposite side of the net. His keen spirit of perseverance and determination are also displayed in application of Osteopathic principles.

● Ross, with a medical family heritage of several generations, entered our ranks in the Sophomore year. Elizabethtown College proudly heralds him as one of her graduates. He is a former outstanding baseball pitcher and has a wealth of experiences behind him. Ross, a member of the Junior Prom Committee, is eager to participate in any event beneficial to the class.

● Quiet! Who is that villain sneaking into the lecture room behind Hank Frey—or is it his shadow? No—wait a minute—why it's Tommy! Tommy comes to P. C. O. from Worcester, Mass., and is following closely in the footsteps of his brother. He was Vice-President of the Sophomore year and is one of the its most active supporters. Personality is his!

*Let your eyes be a microscope of the greatest known power.  
Let your mind penetrate to the remotest period of thought by the  
telescope of reason.*

TRONELLI, REUBEN

● "Work! where have I heard that word before?" When there's work to be done, Rube is there to do it and when there's nothing to be done—well, he's there just the same. Rube, a Philadelphian, entered our ranks as a Freshman after spending a year in the Pre-O Class. He is our class fashion expert and knows the latest in automobiles (body by Mines). Earnestness in everything he does is evident.

TUCKER, WARREN

● A sound body has been said to house a sound mind. Tall, dark and—yes, handsome beyond a doubt, possessing a melodious bass voice, Tucker's primary trends were in his father's steps, which led him to Theological school, at which his ambitions developed into a realization that he was needed in the Osteopathic world. Warren has joined into every activity wholeheartedly.

VAN WAGENAN, SIMON

● Van's chief complaint is that no one will argue with him anymore. Maybe Tina scares debaters away. Tina is the furry girl that leads him around school, through small openings, etc. Sime is the most courageous student in the college and deserves much credit for sticking to his work. He is to be commended for his happy outlook on life.

*The great chemical human laboratory has within itself all necessary qualities, and never fails to bring them into use when wisely called upon to do so.*

VARNER, ALGIE

WEISS, EDWARD

WILLIAMS, GEORGE

● As the old saying goes, "Good things come in small packages." We have in Algie something that is really good. He is an enthusiastic worker and a sincere student, both in the laboratory and lecture room and has a touch of professionalism. Algie hails from Johnstown, Pa., and after spending two years at Albright College, joined our ranks.

● One look at Ed and a few words with him will make you his friend for life. Ed, a staunch supporter of the L. O. G., is one of those fellows who possesses that rare trait which is often desired,—a pleasing personality. Conservatism is his outstanding trait, while his knowledge of the subject at hand seems equal to any occasion.

● Every good class contains men like George. He is one who progresses steadily and surely onward as the months roll by. Serious at times, he is noted at other times for a keen wit and a desire to tantalize his classmates, especially Jack Wilson. Like many of his fellow New Yorkers, George has the quality of earnest determination.

*By reason, we arrive at the conclusion that the duties of Nature are perpetual labor, through the vast cycles of eternity, conducted by the skillful plan of God.*

WILSON, HERBERT J.

● Jack started his study of Osteopathy by taking the Pre-O course. He was then the typical story book Englishman, but after three years of association with us a change can be noted. It must be said that Osteopathy can be proud of him. He is a real conscientious student and is deeply interested in his studies. May H. J. spread Osteopathy in England!

WINTON, CHARLES

● Reserved, dignified and sophisticated, that is Charlie, laconically speaking. He is a quiet, friendly individual whose real personality is only enjoyed by a chosen few. Firm adherence to his chosen profession and the private supervision of a graduate physician certainly are great assets to Charlie's development. In addition, he is a student and considers the practical side, technique of Osteopathy, as a real hobby.

WITTHOHN, EDWARD

● Ed comes from the small town of Pearl River in the Empire State and has grown to possess great qualities. His first Philadelphia education was received at the University of Pennsylvania. A high scholastic record is his. His activities in athletics, fraternal life and collegiate societies, and his success in these are indications of the qualities of leadership which he possesses.

*D. O. means Dig On—Doctor of Osteopathy.*

*Truth has no cause to fear opinion.*

WURZEL, EDWARD

YOUNG, GALEN

YUNINGER, LEWIS

● A flash through the hall,—it must be Wurzel. His unpardonable “pardon me” is a common expression of his subconscious mind. Unforgettable week-ends and good texts are constituents of this New Yorker’s diet. Eddie has instigated a new method of penmanship which has finally gained recognition by his professors. His eagerness and conscientiousness are particularly worthy of record.

● Serious interests and deep convictions regarding all things Osteopathic, color the thoughts and ideals of this member of our class. He has contributed much to the well-being of his class, and his conservative judgment always proves of value in decisions of any moment. Galen is a member of the famous back row, being alphabetically at the foot of the class—but only alphabetically.

● Dutch, a gentleman and a scholar, hails from New Holland. He received pre-medical instruction at F. and M. College in Lancaster, Pa. His chief delights are movies and week-end trips, while reading novels is of no minor importance in the curriculum of this ambitious student. A moaning saxophone is his chief vice. However, these assets combined produce a very likeable chap.

*You dare not assert that God is inferior in power to a man of His own creation.*

## JUNIOR CLASS HISTORY

## Class of 1935

GLEN COLE . . . . .	<i>President</i>
PAUL BONHAM . . . . .	<i>Vice-President</i>
M. ELIZABETH PECK . . . . .	<i>Secretary</i>
FRANKLIN LINDLEY . . . . .	<i>Treasurer</i>
DAVID J. EVANS . . . . .	<i>Student Council</i>

THE largest class yet assembled as Freshmen at the Philadelphia College of Osteopathy, one hundred and forty-seven, presented itself on September 16, 1931.

What a motley array we must have been! Some were eager to become acquainted, some were already known by their pre-osteopathic course, some were a bit bashful, and many of us were too busy to notice the others.

Opening day brought inspiring speeches from the older members of the faculty, many of whom we were not privileged to know until our Junior year. It took Drs. Green and Rothmeyer to make us realize we were not individuals, but a class, and a class which quickly found P. C. O. meant business. They were readily seconded in their project by Mr. Erb, Mr. Stoertz, Mr. Minich, Drs. Durkee, Cressman, Long, and others.

Almost immediately the class appeared to be made up mainly of politicians. For a new class, it seems that there were many arguments pro and con for prospective officers. The final results, however, found Bill Prescott, President, with Glen Cole as Vice-President, Annette Albert, the Secretary, and Paul Hoffmeyer, Treasurer. Paul was succeeded as treasurer by Fred Lenz before the year was over.

It seems that all of the fraternities and sororities of the school decided the members of the class of 1935 should become "brother" and "sister" conscious. Rushing, bidding, and initiations were run off in a fast and furious style at this time and when the smoke had cleared away everyone seemed satisfied.

An important adjunct (important to the upperclassmen), to the Freshman Osteopathic courses seems to be the presenting of a successful Freshman dance. The Hotel Pennsylvania on November thirteenth, Friday, found the class passing this test with the highest possible rating.

January 4, 1932, will be remembered as the date of our introduction to Dissection Laboratory in the Harvey School of Anatomy. This very important step in our course served to increase our zeal, our marvelling at the intricacies of human machinery, and the realization of our task.

The first of our biannual ten-day encounters with the faculty took place at midyears and many were the wounds and scars received, some proving fatal to our classmates.

The second semester found further elaboration on our all important fundamental work of the Freshman year. Our artistic abilities, as well as our patience, were put to test in Histology and Embryology, much to the grief of some of us. Dr. Durkee inaugurated his "table quiz" plan with us.

Elections for our Sophomore year placed Ken Hauck at the helm. Glen Cole was reelected vice-president. The books were entrusted to Packy Carlin, the money to Henry Frey, and the student council activities to Jack Lebow. During the summer, the class was struck with sorrow and disaster when the president-elect passed away. Ken was a likeable fellow who had become one of the most popular men in the class in one short year. In the fall, Cole was made president, and George Tomajan elected to fill out the Vice-President's term. The student roll for the class was now reduced to one hundred and six.

The Sophomore year will always stand out as a pleasant one in our minds despite the amount of work piled on us, especially the first semester. Now, the famous quartet of Prescott-Lenz-Heinemeyer-Tucker proved itself, Dr. Long's Symphony orchestra met with great approval, our initiation into technique began, the series of addresses of "Osteopathy on the Air" began, the great First Annual Osteopathic Charity Ball took place, disastrous "bank Holidays," affecting many of us, occurred. The class dominated at the Christmas entertainment by classes. This year's studies gave us an insight academically into what our persistent labors were to harvest.

Our guides during the Sophomore year, painstakingly laboring with us as we travelled through Bacteriology, Pathology, Nervous Anatomy, P. Chem., Diagnosis, Surgery, Physiology, Principles, Spinal Mechanics, Topographical and Visceral Anatomy were Drs. Py, Dressler, Weisbecker, Mellot, Erb, Stoertz, Apatoff, Lutz, Kiser, Green, Long, Soden, Rothmeyer, and Cathie. Unknowns in Chem. and Bacteriology, drawings galore in Pathology, writeups in Pathological Physiology, special sections in Physical Diagnosis all aided in filling our busy hours to capacity. Now, we hear strange stories of Betty Peck getting ready for class at three in the morning, of Jeanette leaving the wrong door open in the apartment, of Frey explaining Technique by "Rotate as far as you can and then some more," of Herrmann calling Heinemeyer "marasmic," of Dawson breaking the high jump record by leaping an eight-foot hedge to evade a West Philadelphia female, of Edith declaring Struse is as nice as "Py" to her, of Ida telling about Dana's blue eyes, of how Silas is still hiding from Dr. Pennock, and of Tomajan's explanation of guinea pig sex to Dr. Dressler. At this time a group of

earnest, osteopathically minded students formed the D. O. Society or Dig On Society for the purpose of doing special work in technique and in aiding in Dr. Long's research problems. The nucleus of this group consisted of Evans, Bates, Bonham, Dawson, Stephens, Mintzer, Churchill, Mines, Kurz. With the full cooperation of the Dean and the Faculty they have met with much success in their undertaking.

Again, political struggles appeared on a large scale for the election of Junior officers. The officers elected have proven capable and efficient and harmony still reigns. King Cole was reelected to the class presidency, assisted by Paul Bonham. Secretary Elizabeth Peck, Treasurer Franklin Lindley, Editor Ross Bates, and Student Council Representative Dave Evans, complete the elected officers. Bill Clough, as chairman of the Prom Committee, holds the chief appointive office.

The Junior year found our numbers reduced to ninety. Obstetric calls, preparation for Clinic work, field trips in Hygiene, having individual and group pictures taken, coming to a better understanding with Dr. D'Eliscu, cooperating on the Charity Ball at the Penn A. C., putting across our own highly successful Junior Prom at the Benjamin Franklin Hotel on Friday, the thirteenth of April, special Technique sessions, were but part of the things crowding our hours this year.

The Junior year found us preparing for Clinical work. The subjects immediately facing us were Cardio Vascular, Special Pathology, Toxicology, Technique, Neurology, Dietetics, Applied Anatomy, Obstetrics, Gynecology, Metabolic Diseases, Diseases of Muscles, Bones, Joints, Pediatrics, Acute Infections, Hygiene, and Surgery. Our new Professors are Drs. Smith, Flack, Riceman, D'Eliscu, Fischer, Gruber, Kohn, Evans, Drew, and Pennock.

Our great adventure now is being student physicians in the Clinic where we are privileged to apply our knowledge of Osteopathy and watch its marvelous workings. Ours is the greatest clinical program yet attempted. But for those tedious hours back in the years of seemingly endless toil little could we do to guard our reputations. It almost seems that we are off on the right foot inasmuch as patients swarm to the clinic beyond capacity. May we alleviate such a condition by speeding up the favorable discharge list to a new record.

The class has never been very active from an athletic standpoint, but, rather, has stood out for good fellowship and cooperation. There is a definite tendency evident in the class to stick to more Osteopathy and less a mixture of Osteopathy and Medicine. Only the future will prove the determined efforts of the class in that direction.

An aim in life is the only fortune worth the finding; and it is not to be found in foreign lands, but in the heart itself.

## JUNIOR DIRECTORY

ALLEN, BLANCHE C., A.B., B.E.....	1401 State St., Springfield, Mass.

## SOPHOMORE HISTORY

### Class of 1936

JOSEPH C. SNYDER . . . . .	<i>President</i>
GEORGE B. HYLANDER . . . . .	<i>Vice-President</i>
CATHERINE P. LALLY . . . . .	<i>Secretary</i>
EDMUND THOMAS . . . . .	<i>Treasurer</i>
MURRAY E. MILLER . . . . .	<i>Student Council</i>

CAME September 19, 1932, that memorable day when, with the gathering of the class, our first roll call was taken. The roster consisted of one hundred fifteen names including high school graduates, college graduates, and those who had some college work.

The first social event in our two years was College Day held at Willow Grove. We were afforded the opportunity of meeting many upperclassmen and also becoming better acquainted with our own fellow classmates. We predominated in most of the field events and carried the day in easy style in a downpour of rain.

With little ceremony we were swept into our Osteopathic courses and our conception of Osteopathy took place with our important courses of Anatomy, Applied Physics, Histology, Chemistry, Biology, History of Osteopathy, and Embryology.

By this time the members of the class were in a position to justly elect the officers for the Freshman year. In Joe Snyder was detected ability as a leader. He has proven our analysis of him as a capable class president. Gordon Zink ably assisted Joe as Vice-President. Thomas Fleming was given charge of the mercenary end of our troubles, and Alberta Johnson, the former school teacher from Tennessee, used her previous training in keeping the books. Our Student Council Representative was Robert Cooper, acting as a medium in keeping us in contact with the administration.

Before Thanksgiving, riding the goat became popular and many unsuspecting members of the class found themselves affiliated with a college fraternity. According to traditions, the class presented the "Freshman Formal" to the students and the college. Due to the efforts of the committee for this dance and the cooperation of the class the affair exceeded the expectations of the most critical. Like the sword of Damocles the mid-year examinations were suspended over our heads with the faculty holding the scissors. Our fears were not justified for only a few were unable to meet the requirements of our instructors.

In the spring of the year a very unfortunate accident occurred in which we lost Elvin H. Leas, a very promising member of the class.

By this time, having become acclimated to our work, final examinations were approached with slightly less anxiety. Thus ended our first year at P. C. O.

The Sophomore year began September 19, 1933, with a slight loss in membership, but strengthened by the addition of transfers from other professional schools. We immediately delved deeper into the sciences of the healing art and began to see a correlation between our more fundamental work of the first year and the work at hand.

Snyder was again elected as guide of the class in the capacity of president. G. B. Hylander was made Vice-President, while Ed Thomas became Treasurer, Catherine Lally, Secretary, and M. E. Miller represented the class in student Council sessions.

About the middle of the first semester we were put through a rigid ordeal of exams, not of our own choice, but as a result of the far-seeing judgment of our faculty.

This concludes the history of the Sophomore class up to the date of writing. The ensuing events of the sophomores will be enlarged upon next year as juniors.

## PRE-OSTEOPATHIC SCHOOL

THE Pre-Osteopathic school is established as a distinct and separate unit of the institution, superseding the previous identity of "a pre-osteopathic science course." The curriculum of the school has been broadened so as to include some of the cultural subjects so essential to a physician's education. While the subjects offered in the Pre-Osteopathic School are presented in much the same way as they are in other colleges and universities, yet special attention is given to parts of the sciences relating primarily to the study of osteopathy, and an osteopathic perspective and viewpoint is stressed throughout. The advantages of taking the required College preliminary work in an osteopathic atmosphere are self-evident. The environmental factor, intimate association with osteopathic students, observance of the customs of a modern osteopathic college, its clinics, and its hospital, with their fine appointments and facilities, afford incalculable benefits. Students of the Pre-Osteopathic School are not permitted to enroll in any of the subjects of the professional school.

**DEAN HOLDEN HONORED  
BY CLASS-1923  
AND 1933**

**JUNE 3, 1933**

- (1) Dean Edgar O. Holden presented with diamond studded watch by Dr. Arnold C. Brown, President of the Class of '33. Left to right: Dr. Arthur M. Flack, Jr., recipient of the Alumni Gold Medal, presented to outstanding student; Dr. J. Earnest Leuzinger, newly elected president of the Alumni Association; Dr. Arnold C. Brown, Dean Edgar O. Holden.
- (2) Left to right: Dr. C. Earl Evans, Treasurer of the Pennsylvania Osteopathic Association; Honorable Grover C. Talbot, Speaker of the House of Representatives of Pennsylvania, who delivered the principal address at the Alumni Association Banquet; Dr. Ralph L. Fisher, President of the Pennsylvania Osteopathic Association; Dr. James J. Heffernan, Chairman of the Committee on Public Health and Sanitation.
- (3) An oil painting of Dean Edgar O. Holden, presented in behalf of the Class of '23, by Dr. George S. Van Riper, President of the Class. The portrait is in the College Library.

*Reading from left to right: Dr. C. D. B. Balbirnie, The Portrait of Dr. O. J. Snyder presented to the college, Dr. Arthur M. Flack*

### JANUARY 27, 1934

Saturday morning, January 27th, 1934, the thirty-fifth anniversary of the founding of the Philadelphia College of Osteopathy, which became incorporated on January 27, 1899, by Drs. O. J. Snyder and Mason W. Presley, was held.

The founders after many years of patient and consistent teaching, were able to visualize and finally realize the new site at the Northeast Corner of Forty-eighth and Spruce Streets.

Dr. O. J. Snyder, a founder of the Philadelphia College of Osteopathy, was singularly honored by the entire profession, faculty, and students, with an oil painting of him being presented to the College in appreciation of many years of sacrifice, help, and professional interest in the growth of Osteopathy. This portrait now hangs in the College Library.

The Board of Directors, through Dean Edgar O. Holden, also honored Dr. C. D. B. Balbirnie, Secretary of the Board of Directors and Professor of Therapeutics, with an honorary degree of Master of Science, together with Dr. Arthur M. Flack, Professor of Neurology and former Dean of the Philadelphia College of Osteopathy, with a Master of Science Degree.

Both men have contributed a great portion of their lives in the advancement of osteopathic education and its principles. Today they can look back and visualize the tremendous growth that osteopathy has made indirectly through their efforts and patience.

Dr. Ross Stover, Pastor of the Messiah Church and well known to radio listeners because of his weekly broadcast over Station WLIT, was the principal speaker of the day.

"Never forget, that your most urgent need is for preparation that is thorough for such a sound equipment of knowledge and facility that you will be able to meet confidently and adequately the manifold problems that will confront you in practice. Only by such unremitting, conscientious effort, in college and afterwards, can you hope to be worthy of your high calling and to command the honor which is peculiarly the reward of the able physician."  
—J. J. Snyder.

Dr. Snyder realizes a dream fulfilled with the \$1,000,000 Philadelphia College of Osteopathy

## THE FACULTY'S PART IN OSTEOPATHIC ORGANIZATIONS

(This list may not be complete in every detail)

- DR. O. J. SNYDER—Past President, A. O. A.; Recipient of Honorary Degree D.Sc., Philadelphia College of Osteopathy; Past President, Pennsylvania State Board Osteopathic Examiners.
- DR. EDGAR O. HOLDEN, *Dean*—Chairman, A. O. A. Bureau of Hospitals; Pennsylvania Representative, House of Delegates, A. O. A., Milwaukee Convention; Past Secretary, Associated Colleges A. O. A.
- DR. EDWARD A. GREEN, *Registrar*—Secretary, A. O. A. Associated Colleges.
- DR. CHARLES J. MUTTART—Executive Board, Pennsylvania Osteopathic Association; Past President, County Society.
- DR. D. S. B. PENNOCK—Member Pennsylvania Osteopathic Surgeons Examining Board.
- DR. ARTHUR M. FLACK—Former member Associated Colleges Board.
- DR. WILLIAM S. NICHOL—Executive Board, Pennsylvania Osteopathic Association.
- THE LATE DR. J. IVAN DUFUR—Trustee, A. O. A.
- DR. E. G. BREW—Member Pennsylvania Osteopathic Surgeons Examining Board; Past President, American College of Osteopathic Surgeons.
- DR. PETER H. BREARLEY—Past President Philadelphia County Society.
- DR. H. WILLARD STERRETT—Pennsylvania Representative House of Delegates, A. O. A. Milwaukee Convention; Committee on Practical Uses of Moving Pictures.
- DR. WM. O. GALBREATH—Past Chairman, Advisory Board, Pennsylvania College of Osteopathy.
- DR. H. WALTER EVANS—Associate Editor, *The Osteopathic Profession*.
- DR. C. D. B. BALBIRNIE—Past President, Philadelphia County Society.
- DR. RALPH L. FISCHER—President, Pennsylvania Osteopathic Association; Pennsylvania Representative, House of Delegates, A. O. A., Milwaukee Convention.
- DR. FREDERICK A. LONG—Executive Chairman, 1930 National Convention.
- DR. C. HADDOX SOREN—A. O. A. Committee Nomenclature and Technique.
- DR. GEORGE S. ROTHMEYER—A. O. A. Committee on Nomenclature and Technique.
- DR. J. FRANCIS SMITH—A. O. A. Section Chairman, Neurology.
- DR. MARION DICK—A. O. A. Section Chairman, Physical Therapy.
- DR. PAUL T. LLOYD—Pennsylvania Representative, House of Delegates, A. O. A., Milwaukee Convention.
- DR. J. ERNEST LEUZINGER—President, Alumni Association, Pennsylvania College of Osteopathy.
- DR. OTTERBEIN DRESSLER—Member Public Relations Committee, Pennsylvania Osteopathic Association.
- DR. RUTH E. TINGLEY—Associate Editor, *The Osteopathic Profession*.

## INTER-FRATERNITY-SORORITY COUNCIL

TO PRESERVE harmony among the fraternal organizations of the college, to direct rushing and pledging, and to consider problems of common interest to these organizations, are the duties of the Inter-Fraternity-Sorority Council.

Membership is composed of one representative from each fraternity and sorority, and a faculty representative through which a faculty governing board announces the eligibility of those students proposed for membership.

## FRATERNITIES AND SORORITIES

**F**RATERNITIES are logical and natural institutions which have grown up to meet a very natural and human need in every young person, the need of comrades, of fellowship. The idea of fraternal association is as old as the race. We find examples in all tribal councils of wandering peoples, in the Lyceum of Athens, and in the pupils who gathered about Socrates and Plato for the benefit of mutual knowledge and association.

At P. C. O. as in other colleges the Fraternities and Sororities play an important part in cementing friendships which last, not only while the individuals remain in college, but long after they have become alumni. This feature of fraternal life is especially gratifying to those who come to college seeking lasting friendships as well as knowledge. Fraternity men and Sorority women are also encouraged by their organizations to join in the many extra-curricular activities which are both educational and cultural. Contacts with older members of the fraternity as well as contemporary members do much to develop character.

## STUDENT COUNCIL

THROUGH the Student Council, problems of student interest are brought before the college administration for consideration and discussion. In this way an efficient and worthwhile relationship between the student body and the administration is maintained, and a harmonious program is promoted.

The Council is composed of nine members, the president and a representative from each of the upper four classes of the College proper, and a ninth member, elected by popular vote of the entire Student Body, who serves as President of the Council. The President must be a member of the fourth year class. Regular meetings are held throughout the year, at which time appropriate topics are discussed.

M. Bailey, Nikola, Barrett.

GEORGE NIKOLA, *President*

ROBERT BARRETT, *Vice-President*

MARTHA M. BAILEY, *Secretary*

## NEURONE SOCIETY

EVERY student in the college is a member of the Neurone Society. It is a scientific and social organization of the student body of the college. Its organization took place February 24, 1902. The declared objects of the society comprise the development of Osteopathic organization, the promotion of interest in scientific subjects and the establishment of good fellowship among students. Monthly meetings are held in the College and various Osteopathic and general topics are discussed. The expenses incidental to social programs are defrayed from the Student Activity Fee. Neurone develops a spirit of camaraderie, and the fixation of that memory which brings the "old grad" home again, time after time, to look the place over and marvel at her progress.

Nikola, Becker, Frey, Barrett, Griesse.

## SENIOR NEO HONORARY SOCIETY

THE Neo Senior Honorary Society was founded at the Philadelphia College of Osteopathy in 1924, by ten members of the class of '25. The purpose of this society is to promote student activities, interest in athletics, and good fellowship among the students and with the profession at large. The members are elected on the basis of extra-curricular endeavor and personal concern in the active phases of student life. At the Junior Prom held each spring, keys are awarded to those members of the Junior Class who have most effectively maintained and promoted outside the classroom the fine spirit so essential to student life, in the estimation of the society.

## SIGMA ALPHA OMICRON

THIS is the non-secret honorary fraternity of the College, and was established eight years ago. To be eligible for membership the student must maintain a general average of 90 during each of the first three and a half years of his professional study. Attendance of 90 per cent of all classes is required. The Sigma Alpha Omicron has done much to promote high scholastic achievement.

From an eligibility list based on these factors, selections are made by a Faculty Committee on Membership. The complete roll call of the fraternity follows:

<i>Class of 1925</i>		
Charles W. Cattaneo	Alexander Levitt	Solomon E. Yoder
	Wilbur P. Lutz	
<i>Class of 1926</i>

## E. G. DREW OBSTETRICAL AND GYNECOLOGICAL SOCIETY

UNDER the direction and guidance of Dr. Edward G. Drew in 1925, this society was inaugurated for the purpose of furthering a knowledge of two closely allied and highly important branches of the healing art, Obstetrics and Gynecology.

Obstetrical treatises, prepared by the members, are read at the closed meetings, with several instructive lectures and presentations by visiting lecturers at the open meetings. The hearty cooperation of members of the faculty have made possible demonstrations of real value. Election to this society is based on interest, ability and the acceptance of theses submitted during the second semester of the Junior year. With a continuation of the activities already present in this society, it should become an increasing force in the advancement of these all-important phases—Obstetrics and Gynecology.

## PHYSIOLOGICAL CHEMISTRY SOCIETY

THE Class of 1930 first formed a group for the purpose of doing original research to advance the relationship of Physiological Chemistry to Osteopathic Principles. Out of this group sprang this society. The basis of election to the society is an average of at least ninety during the Freshman and Sophomore years of Chemistry, and, in addition, a personal record of interest in research in the chemical field which is acceptable to the society. In addition, Associate Members may affiliate themselves with the society, but do not attend the closed and business meetings of the group. Under the able direction of Profs. Erb and Stoertz, and with capable outside speakers, the society has done much in Chemical Research.

STANDING: Cooker, Poglisch, Bosbart, Newman, Sobel, Hall. SEATED: Freeman, Finn, Schubert, Dr. F. J. Smith, Dr. Dick, M. Bailey, Kramer.

## J. FRANCIS SMITH NEUROLOGICAL SOCIETY

THIS society was founded for the purpose of stimulating the interest of the student and to foster research in the application of the Osteopathic concept as applied to the various phases of Neurology. Through this medium, an abundance of clinical material is presented from which the members gain practical knowledge. Some open meetings are held, chief among which was the presentation of Dr. A. G. Hildreth, Dr. J. Francis Smith and Prof. Russell Erb on March 6.

The membership is limited to twelve students who are chosen each year from the Junior Class on the basis of their interest in the work and a submitted thesis.

Schubert, Dr. Lutz, Newman, Dr. Dressler, Wheeler, Pohlrig.

## CARDIO-VASCULAR SOCIETY

FEBRUARY 28, 1931, marked the founding of this organization which was formed for the purpose of stimulating the interest in the subjects under consideration and to give its members an intensive study of clinical subject matter in general. The Clinical advisory board consists of Drs. Fischer, Lloyd and Lutz. The membership is limited to six Seniors and but one officer is elected. Before receiving the key of the society, each member is presented with a clinical case on which he will be required to elicit all physical signs, give a diagnosis and differential diagnosis, prognosis and treatment suggestions.

## THE GEORGE S. ROTHMEYER GASTROENTEROLOGICAL SOCIETY

THE Gastroenterological Society, although the most recent of the college societies, has done much to promote further interest in the Clinical Diagnosis and the study of the various diseases of the Gastro-Intestinal tract. This group was first formed in 1932, under the direction of Dr. George S. Rothmeyer, Professor of Gastroenterology. This Society is very active and has several open meetings to the college in addition to its closed meetings. An annual dance is also held by the society.

BACK ROW: McDonald, Bellew, Sullivan, Firey, Majeski, Reilly, Donohue. SECOND ROW: Vergara, Dayton, Fiesco, Aveni, Walsh, Dunleavy, Krazinski. FRONT ROW: Prudenti, Alvarez, Lally, Finn, Barrett, Costello, Antry.

## NEWMAN CLUB

IN 1893, in honor of Cardinal Newman, the first Newman Club was founded at the University of Pennsylvania. On March 22, 1927, the Newman Club of this college was formed and numbers among its members many alumnae as well as students. Adhering tenaciously to the ideals of Cardinal Newman, this organization makes an extensive appeal to students of the Catholic faith. In common with over two hundred such organizations throughout the United States, the Osteopathic unit promotes scholastic and social achievements, without restricting its members academically nor in the choice of affiliations with various fraternal organizations.

## JUNIOR PROM COMMITTEE

THE big social event of the year is the annual Junior Prom, occurring in the spring of the year, under the direction of a committee chosen by the Junior Class officers. The Senior class is honored by the Junior class at this dance annually.

The committee is composed of a representative from each fraternity and sorority, and three non-fraternity members. Much praise is due this committee for their very successful efforts in this year's Prom, at the Hotel Benjamin Franklin, on April 13, 1934.

*Reading from left to right: (1) Peter Van Steeden and His National Broadcasting Orchestra, heard every Wednesday night with Baron Muncausen, supplied the music for the Charity Ball. (2) Harold Richards, soloist, who assisted in the broadcast. (3) Dr. R. McFarlane Tilley, Brooklyn, N. Y.; Dr. Mildred Fox, Mt. Holly, N. J., conferring with Dean Edgar O. Holden, Executive Chairman of the Charity Ball on the Program of Activities. (4) William O'Neall, one of the many entertainers. (5) Reception Committee who met Kathleen Wells, nationally known soloist, featured with Peter Van Steeden. (6) A group of Junior Hostesses under the direction of Miss Louise Hollis, who acted as flower girls.*

## CHARITY BALL ATTRACTS RECORD CROWD

### Coast to Coast Broadcast Heard by Millions—Peter Van Steeden and Three Orchestras Furnish Syncopation

FOUR dance orchestras totalling fifty-two pieces furnished the varied rhythms at the Second Annual Charity Ball for the Osteopathic Hospital and its Clinics in the main ballroom of the Penn Athletic Club on Friday evening, February 23rd, before a crowd of 2,000 people.

Preceding the Grand Ball, a dinner was held with over four hundred people attending. Throughout the dinner, dance music was furnished by Horace Hustler and his Gingham Club Orchestra, well known to many Philadelphians. Several stage and screen personalities put in a personal appearance and received a tumultuous reception for their efforts.

The Lee Sisters, of movie fame, in addition to making an appearance put on a skit and sang several songs. Vera Nivna, appearing at the Walton Roof, with the Walton Roof Orchestra, sang three popular songs and was forced to do several encores before being allowed to leave. By nine-thirty, the tables were being cleared away prior to the start of the Grand Ball.

On the dot of ten o'clock, Peter Van Steeden waved his baton and the Second Annual Charity Ball was in full swing.

Lights were dimmed, a large crystal ball with colored lights reflecting on it slowly circled above, casting various colors down onto the dance floor. First a waltz and then a fox trot blended with the voices of Miss Kathleen Wells, diminutive singer appearing with Peter Van Steeden's Orchestra, and Harold Richards, tenor soloist, was only a few of the outstanding numbers to be heard. At eleven-fifteen, a stage show with some of radio's prominent personalities was presented to the gay colorful crowd. Finn Williams, vagabond singer of the air, gave a rendition of "Old Man River" that was well liked. William Hall, of radio fame, sang two numbers in a rich baritone voice for which he is so popular. Will Mahoney, The Four Franks, Kenneth Harlan and William O'Neal, formerly heard on the Chevrolet Hour and who appeared in the "New Moon" and in "Countess Maritza," were several of the famous stars to put in an appearance.

As the curtain came down on the final act preparations were made for the coast to coast broadcast scheduled for 12:00 M. The Orchestra played several preliminary numbers for testings. At exactly 12:00, Mr. Joseph Nassau, Director of Station WLIT, stepped up to the microphone and introduced to the nation the Second Annual Osteopathic Hospital Charity Ball.

For one-half hour Peter Van Steeden and his orchestra played popular tunes of the day pausing only to allow Mr. Nassau to make the station identification. Throughout the broadcast Miss Wells and Mr. Richards sang the vocal choruses of several of the songs, often combining as a duo. The broadcast finished at 12:30 but the dancing continued until two o'clock, and a tired but happy group of people knew that the Second Annual Charity Ball had been a huge success.

At the conclusion of the Ball, it was announced that a Third Annual Charity Ball would be held next year on the night of February 23, 1934, at the Penn Athletic Club. WHAT AN EVENT! WHAT A NIGHT! WHAT MUSIC!

## BASKETBALL

TWO weeks prior to the Christmas holidays, Coach Allie McWilliams issued a call for all basketball candidates, and in response fourteen men reported for the initial practice at the West Branch Y. M. C. A., 52nd and Sansom Streets. Among the veterans to appear were Captain George Nikola, Bill Furey, star athlete from St. Joseph's High, Bud Hylander, who later in the season was forced to the sidelines with injuries, Martin Schnoll, Bob Cooper and Elias Korn.

The new candidates that were later selected as first string substitutes and made a creditable showing throughout the season, were Dick Jameson, hailing from Portsmouth, N. H.; Henry Maciejewski, a graduate of Wilmington High School, and Arthur Bunting, who resides in Lynn, Mass. Coach McWilliams was ably assisted in his coaching duties by George Gilham and these two capable tutors combined to make the maroon and gray year a success.

Osteopathy opened its season by defeating the Drexel Institute five on the latter's floor, by the score of 42-39. The Dragons took the lead at half-time and continued to hold it until the last minutes of the game. It was at this juncture that the maroon and gray squad began clicking and with a whirlwind attack overcame the

big margin emerged victors. Jameson, playing his first collegiate game captured the scoring honors for the evening, securing 15 points.

Coach Allie McWilliams' charges were the victims of a smooth functioning, well drilled Wheaton College team in the first intersectional game ever to be played by the osteopaths. When the gun sounded ending the hostilities, the boys from Illinois were on the long end of a 36-24 score. With height in their favor the visitors soon showed their supremacy by holding an 18-11 lead at the half and continued to outplay the homesters through the remainder of the game. Grant Lawrence, former Glen-Nor High athlete captured the scoring honors for the scrap garnering 10 points. For the doctors, Schnoll secured nine points to lead the future osteopaths.

Osteopathy lost its second straight game, when they were defeated by the strong Swarthmore College five at Swarthmore on January 13. When the final gun sounded the score showed the osteopaths on the short end of a 37-27 counting. The maroon and gray passers appeared to be tired from their recent setback at the hands of the Wheaton College squad but nevertheless they forced the Garnet dribblers to give their best to emerge victors. Bill Maciejewski garnered seven points to lead the local lads in scoring.

Snapping out of a two-game losing streak the McWilliams coached team triumphed over the fast-moving Gallaudet University of Washington, D. C., to the tune of 36-29. The osteopaths were forced to put on a last-minute rally to win and it was during this period that Captain Nikola piled up baskets, to make his total for the game, thirteen markers.

On February 10, the College of Osteopathy squad travelled to Bethlehem and met defeat at the hands of the Moravian College five, the final score being 38-20. The upstaters found the range of the nets early in the game and piled up a commanding lead which they held throughout. However, Schnoll, high scoring forward for the losers, was able to eke 10 points to keep the doctors within striking distance of the winners. Reese, diminutive forward for Moravian, tallied 19 points to capture scoring honors for the game.

Coach Allie McWilliams' Osteopathy quintet were the victims of Len Tanseer's La Salle College team in their next game held on the latter's floor on February 16. The final score was 38-21. At no time during the game were the West Philadelphians able to cope with the fast moving offense of the Olney Street five but they never let down in trying to overcome the big lead piled up by the victors. Schnoll once again dominated the scoring column for the losers.

Determined to crash into the win column once more the Osteopathy team travelled to Elizabethtown and trounced the Elizabethtown College passers to the tune of 37-29. The maroon and gray squad on the rebound from their last defeat were a

(Continued on page 176)

## GOLF

WITH virtually the same team to build from the College of Osteopathy golf team is expected to better the record made by the 1933 squad. Several newcomers from the lower classes will, no doubt, add to the strength of the present team.

Charles Burrows, captain of the osteopaths, Charles Hillyer, playing-manager; Donald Gibbs, of London, England, and Joseph Walker are the holdovers around which the future doctors' hopes will be centered. The new candidates are:—Harry Kerr, Ray Speer, Joe Hughes and Jim Walsh.

Player-manager Hillyer has announced the following schedule of matches:

April 6—Temple University  
 April 10—St. Joseph's  
 April 19—Haverford College  
 April 27—Villanova College

Manager Tomajan has announced the following schedule of meets:

## TRACK

**H**AROLD OSBORN, holder of the world's outdoor high jump record and at present a student at the Philadelphia College of Osteopathy, led his maroon and gray squad into action on April 14 against Drexel Institute on the latter's field at 47th and Haverford Avenue.

This meet marked the opening of the track season at the West Philadelphia Institution. Several practice sessions have been held and Osborn is looking forward to a very successful year on the cinderpaths. Several holdovers from last year's team have reported and appear to be in excellent shape for the intensive schedule mapped out for them.

Among the veterans who have been working out daily are: George Stauffer, pole vaulting star; Gordon Zink, sprint ace; Elton Albeck, former Germantown High track man and Bill Furey, all-around star who is expected to share honors with Osborn in the forthcoming meets. Furey proved to be a one-man track team last year capturing places in the high jump, pole vault, discus and the shot-put.

- April 14—Drexel at Drexel
- April 21—La Salle at La Salle
- April 24—St. Joseph at St. Joseph
- April 27-28—Penn Relays
- May 5—Susquehanna at Susquehanna
- May 8—Philadelphia Normal at home
- May 12—Juniata at Juniata

UPPER LEFT—DIVING—Jack Hexter; HEAD IN WATER—Simon Lubin, star sprinter; LARGE CENTER IN WATER—Charles Norton, 220-yard free style winner. LOWER, left to right—Ray Spanjer, Captain for 1934-35 Swimming Team. LOWER CENTER—Nathan Ostroff; SHAKING HANDS—left to right—Bud Hylander, Sprinter, shaking hands with Flocco, Captain of West Chester State Teachers College and noted diver.

## SWIMMING

A SWIMMING team, the first of its kind at the Philadelphia College of Osteopathy, made its debut in inter-collegiate competition this year and as a result captured five of the six individual meets. All the home meets were held in the West Branch Y. M. C. A. pool at 52nd and Sansom Streets. Incidentally, the maroon and gray squad triumphed in all their home meets.

Coaches Anthony and Charles Roeser, former Temple University aquatic stars, were fortunate in having an abundance of experienced material to mould into a team. In addition, several new candidates reported and added strength to the varsity squad.

In the backstroke events, Osteopathy was represented by George Brehm and Nat Ostroff, who often splashed home in first and second place respectively. The Roeser

brothers were also fortunate in having an almost steady winner in the breaststroke, it was Ray Spanjer, a member of the freshman class. Ostroff also was in the running in this particular event.

Jack Hexter, a pre-osteopath, was the maroon and gray competitor in the diving event. In the freestyle, Simon Lubin, former Simon Gratz High School ace and Bud Hylander, erstwhile West Philadelphia High School aquatic star, were the two men around which Osteopathy pinned their hopes for a successful season. Dave Myers, Charles Norton and Brehm were also seen in competition in this event. The crack relay team that showed both speed and endurance was composed of Hylander, Norton, Lubin and Myers.

The first two meets of the year were with Villanova College. The initial encounter resulted in a one-sided victory for the osteopaths, when they submerged the Wildcats by the score of 40-19. Si Lubin carried off honors in this meet, capturing the free-style events. In their return engagement it proved to be a bit more interesting but the doctors once again triumphed to the tune of 37-22. The dedication of Villanova's new pool was marred by the victory of the Roeser-coached aggregation.

Following their impressive triumphs over the Villanova mermen, the osteopaths met a snag in the person of Swarthmore College. The Garnet swimmers subdued the West Philadelphians by the score of 40-25.

Copying the same procedure that they employed against the Main Liners, the maroon and gray registered a double triumph over the West Chester State Teachers College natators. The first meet showed a score 46-20, while the final markings in the return meet showed a much larger tally, 48-17. Hylander and Lubin shared honors in each of the encounters.

The next week the doctors ventured into the eastern intercollegiate championships held at Newark, Delaware, on March 10. Although unable to place in the finals they gave a good account of themselves in the trial heats. This sort of competition was exactly what they needed to pull them through in their final meet of the year against the Rider College swimmers from Trenton. When the final event was finished and the score compiled it showed that the osteopaths had emerged a close victor, the score being 30-29.

The outstanding highlight in the entire swimming season, was the development of Simon Lubin. He is now among the first five fastest swimmers in eastern intercollegiate competition, capable of doing the 100-yard freestyle around 55 seconds. A more elaborate schedule has been planned for next year due to the vast amount of experience resulting from the meets with the outstanding local institutions.

## TENNIS

**O**STEOPATHY will be represented by one of the strongest tennis teams in the history of the institution this coming season. The only absentee from the 1933 squad is Bud Christensen, former runner-up in the eastern inter-collegiate tennis championships in 1932 and captain of last year's squad.

The following men will form a squad that is expected to offer stern opposition to the teams that will face them this year: Captain-elect George Nikola, Kelley Streicker, the only southpaw racquet wielder on the squad, Carl Beasley, and several other candidates who are expected to report for the first practice session to be held shortly.

To date the schedule is:

- April 14—Ursinus at Collegeville
- April 19—State Teachers at home
- April 24—State Teachers at West Chester
- April 28—Juniata at Huntingdon
- May 5—Swarthmore at Swarthmore
- May 11—Juniata at home
- May 12—Moravian at Bethlehem
- May 25—Ursinus at home

## BASEBALL

COACHES George Gilham and Rube Chambers, both well known in local competition, will again handle the baseball team of the Philadelphia College of Osteopathy. Manager M. Carl Frey was compelled to arrange a limited schedule due to the cancellation of the sport by the Graduate Council on Athletics early in the season.

In spite of this handicap and limited time allotted for practice due to clinical interference and inability on the part of the upper classmen to compete this year because of severe scholastic clinical schedule, the sophomore class is expected to carry the heavy burden of the team positions.

The Osteopaths opened their season on April 14th meeting Drexel at Drexel in the opening clash of the season.

Several hurlers from last season's team will hold down the pitching jobs this year. Bob Cooper, former Temple University twirler, will be the leading candidate and is expected to start all games on the mound. There are many new aspirants for this position who reported to Coach Gilham. The catching position will be taken care of by Bill Maciejewski, a member of the sophomore class.

Martin Schnoll, newly elected captain of the basketball team, will be seen at his old place, the initial sack. Paul Murphy, formerly of U. of P., and M. Carl Frey, will form the double play combination at second base and shortstop respectively.

At the torrid corner, Elias Korn, last season's regular third-sacker, will be back at his old position. The out-field will be composed of varsity lettermen from last year. Bud Hylander, leading slugger on the maroon and gray, will patrol left field. In the middle garden Henry Hillard will chase the flyballs that come his way and in the right Scotty McCollum, utility hurler, will be seen when he is not called upon to pitch.

## INTERNES

**N**EAR the termination of the year, competitive examinations are given to those Seniors who may desire an internship in the Hospital. Not alone is the student chosen by his grade on the examinations, but by his attitude while treating in the clinics, and during his Senior internship, as found acceptable by a Faculty Committee. These Physicians are put on the various services as Osteopathic, General, Surgical, Out Patient, Obstetrical, Emergency and Laboratory Diagnosis, and much practical knowledge is gained in the work of these departments.

One or two, showing the greatest interest and adaptability to the work, may be held over as Senior Residents for the following year, at the end of which time they may take the Surgical Board Examinations.

THE LOBBY

THE NURSERY

FIRST ROW: Law, Byerly, Marvel, Mrs. Hardcastle, Miss Sterrett, Sieczney, Sacchi, Frison. SECOND ROW: Baughman, Waltz, Crandall, Heist, Morrison, Koenitzer, Lyon, V. Evans, Moyer, D. Evans. THIRD ROW: Monroe, Holland, Spare, Gosper, Allen, Gaskill, M. Kochut. FOURTH ROW: Wisel, Bond, Thorin, Moore, Beurhause, Craig.

## OSTEOPATHIC SCHOOL OF NURSING

THE Osteopathic Hospital of Philadelphia maintains one of the most modern Schools of Nursing. Under the careful instructions of experienced and graduate supervisors, these young women are given a thorough course in all the phases of general nursing covered in accordance with the requirements of the Pennsylvania State Board of Nurse Examiners. The training course consists of three years of regular classroom work, supplemented by practical work in our Hospital.

## PATHOLOGY—THE SCIENCE OF DISEASE—IN THE YEAR 1933-34

*By*

OTTERBEIN DRESSLER, D.O.

**M**EDITATION on the great humanitarian science must carry two conflicting emotions: object despair in viewing the multiferous and seemingly insurmountable problems still to be conquered, or, the elation of hope that the succeeding years may be crowned with the glory of discovery that was seen in the latter years of the 19th century and the early years of the 20th.

To my humble and inexperienced mind it appears that Pathology is a victim of the same problem facing all science and philosophy. These twin children of learning have indulged in an orgy of analysis and discovery for several decades till there has been amassed such an abundance of facts that advance is virtually impractical. Philosophy

TY

needs a synthetic Philosophy; Science needs a synthetic Science. It is time to call a holiday from this wild Orgy of discovery to provide time for a sane evaluation of these facts and to correlate them, and to give a perspective of the problems of today.

In 1793, when a great epidemic of Yellow Fever, destroyed a large percentage of the populace of Philadelphia, Benjamin Rush noted in his writings the unusual heat and humidity together with the enormous number of mosquitoes. Why didn't he and others notice the association of the climatic conditions and insects with the disease? Is it not possible that we too, in our mad scramble for discovery, are overlooking the significance of already discovered facts.

In this year, 1934, it is very urgent that we review our forces and our position, that we obtain a clearer perspective of our objective and a truer analysis of the obstacles in the path of the advancement of our Science.

## APPLYING EDUCATION TO OSTEOPATHY

*By*

RUSSELL C. ERB, B.S., M.S., F.A.I.C.

THE advances which osteopathy has made in this country during the last twenty-five years have been practically alone in the science itself and in its value to the public. Advances in the future will be made in the field of education. It, therefore, should be a timely consideration to give serious thought to our methods of education as applied in the several colleges of osteopathy.

It is impossible to formulate a theory of education except from the standpoint of a conception of its aims. In general, the aims of human education can be grouped under two main headings—efficiency and personal culture. Teachers must strive to make students efficient living units and at the same time they must exert all their pedagogical dynamos toward the production of a personal culture in every student coming under their influence.

The time element does not permit of a great deal of expansion along the personal culture aim of education. We hold that such subjects as the basic sciences, while

looked down upon by some, are in fact better adapted to satisfy the aims of education than some of our so-called specialty subjects. The basic sciences afford the teacher devices for aiding in personal culture through mental discipline. At the same time, these basic sciences offer mental armamentarium necessary for efficiency in the formation of the scientific concept of osteopathy.

Let us, therefore, adopt as our promise that as teachers in an osteopathic college, our foremost aim is to make our students efficient. In short, it is our duty as teachers to readjust the life of Freshmen during an arbitrary period of four years so that at the end of that time we should have an efficient osteopathic physician.

The principle task before us is that of readjusting the mental lives of our students so that they may efficiently meet the tests arising in a practical world. Are we consciously holding this aim or purpose before us while we are engaged in teaching?

The lecture method of teaching has but little value in modern life. The lecture method of imparting knowledge anti-dated the printing press. Our students are required the ability to read. They should be required to own text books (not notes). With these requirements rigidly enforced, it is educational asininity to lecture on subject matter already before the students on printed pages.

For a time, let us consider some of the disadvantages of the present lecture system:

The lecture method makes no attempt to cultivate original thinking. It answers questions before it asks them. The student is literally bombarded with, let us hope, facts during an hour encounter. His only hope is that he can jot down notes faster than the lecturer talks. When this is impossible, he requests mimeographed notes so that he may have an easier time before examinations.

The lecture method does not permit the student a freedom of self-expression. He is assigned to a room in which he must sit in an assigned seat and exhibit forced attention. His mind is not usually in the receptive mood and here again he must fall back on some meagre hastily assembled notes. The student's individuality is lost.

The efficiency of a physician may be measured by his ability as a diagnostician. But even in the so-called presentation clinics, the lecture method influences the period of instruction. A case is presented, the case history is read, the provisional diagnosis announced, and the patient exhibited to the class with the physical findings pointed out to the class to substantiate the diagnosis made by some one else. The student is merely given an opinion, often cloaked as fact. The student is expected to believe and is not encouraged to contradict the diagnosis or to form an original diagnosis. He has his diagnosis done for him. He has not been educated to diagnose for himself.

Let us further amplify this lecturing with case presentation. Suppose that the instructor would adopt a critical mien. Suppose he would question the thoroughness

of the case history. By adopting this mood, the student naturally would tend to assist the instructor in finding fault with the historical phase of the case. In doing so, the instructor would be encouraging original and critical thought in the mind of the student, which is necessary for the attainment of efficiency as the aim of education.

A normal student should be made to acquire five attainments, namely:

1. A skill in observation and experiment.
2. A better memory and knowledge of relevant facts.
3. An ability to reason and think in a logical systematic way.
4. A cultivation of the imagination.
5. Development of a critical and impartial judgment.

The first attainment, i.e., skill in observation and experiment cannot be obtained by the now popular lecture method. Laboratories, clinics and demonstrations are the desideratum. Our entire fabric of knowledge is based on the ideas that come to us from our senses. Lecturing merely stimulates the ear—and this becomes deaf when sleep overtakes the student. The laboratory period, the clinic hours and classroom demonstrations stimulate the eye, the ear, the nose, the tongue and the touch. A good teacher can arouse all the avenues of sense perception.

2. In the attainment of a better memory and knowledge of relevant facts the function of the teacher is that of guide and adviser. The class period must become a conference period during part of which clear assignments are made and the "meat" pointed out from the "gravy" in modern text books.

3. The ability to reason and think in a logical systematic way cannot be attained by sitting through long and sometimes uninteresting dissertations. This brings forward the great word of the Herbartian system, namely, apperception. By this term is meant the active contribution of the mind to ideas received through sense-perception and memory of relevant facts. First, we perceive a thing, then we identify or classify it. This identification or classification is what the mind, from its previous knowledge, adds or contributes to the sense-perception. When we identify or classify an object presented to our senses, we apperceive it. Apperception is necessary in diagnosis. Students who have not been educated along the lines of apperception cannot rightfully be considered efficient.

4. A cultivation of the imagination. Most instructors belittle any tendency

that a student may have toward native imagination. Some instructors go to the extreme of utilizing the weapon of sarcasm to put "day-dreaming" students back to their assigned seats in the lecture room. Many lecturers have pronounced objections to the interruptions caused by the imagination of students during class periods. Some teachers adopt the "Don't be foolish" mood, or "It can't be done" sneer, with students possessing strong imagination. It is the duty of a teacher to encourage imagination. It has been said that a disciplined imagination has been at the bottom of all great scientific discoveries. We must therefore encourage in our students the same imagination that fired the mind of the founder of osteopathy.

5. A development of a critical and impartial judgment. This is the requisite for all clever diagnosticians. Each case or proposition must be judged solely on its merits. The imagination is a dangerous but useful ally. The conference idea of instruction with the teacher-adviser employing the Socratic method of instruction should go far towards the development of a critical and impartial judgment. If a class is informed that a case of diabetes will be presented, all the findings will be interpreted as diabetic, because a critical and impartial judgment has not been formed. However, if the case is presented as a questionable condition, a critical and impartial judgment may be stimulated.

In all of these considerations of educational attainments, we must assure the student a freedom with responsibility. Rousseau was the first to advocate the utilization of the principle of freedom in education. It was emphasized also by both Pestalozzi and Froebel and stimulated by Montessori. Rigidity in educational practices must be replaced with flexibility and academic freedom. Our students have different native abilities. Our method of teaching must be flexible enough for adaptation in individualistic instruction. Our method of measuring attainment must possess sufficient freedom so that worthy students are not removed from academic engagements because they failed to obtain an arbitrary and numerical grade.

Final examinations in a subject are necessarily the only method of determining the educational progress a student has made. If a pedagogue embodying the principles provided in this paper cannot determine the "worth" of a student after a year's contact, then that pedagogue should go to chicken raising or engage in some other "fowl" business.

## OSTEOPATHY AND RESEARCH

BY FREDERICK A. LONG, D.O.

**O**STEOPATHY has scored a brilliant therapeutic success. Compared to this growth of practice, its literature is in its infancy. To the early investigators much credit must be given for pointing the way and our research workers of the past have done creditably in view of the many handicaps under which they were forced to labor. The work done by these workers has been largely animal experimentation. It is, however, impossible to present an adequate explanation of our philosophy on the basis of this experimentation alone. To attempt to do so is to invite just criticism.

The need for abundant clinical research and human experimental study becomes apparent when one reviews osteopathic literature. The need for animal experimentation was long ago recognized and some valuable groundwork has been started. That this animal experimentation should continue is imperative. There has not been a comprehensive, systematic, and scientific compilation of statistics of human studies either clinical or experimental. Scattered attempts at such compilation have appeared from time to time, but they have not been very productive. Certainly the principles of osteopathy can be presented in terms of human as well as animal experimentation. Certainly the results of osteopathic therapy can be presented in terms of clinical studies and in forms which are acceptable criteria in any system of the healing art. This human study, both clinical and experimental, forms the basis of the research activities at the Philadelphia College today.

This human study divides itself into clinical and experimental. Experimentation along various physiological lines can be carried out without difficulty by research units and these experiments can be carefully controlled because all related procedures are under direct supervision. It is when the attempt is made to study clinical records that great difficulties are encountered. These difficulties, I am sure, have spelled failure for many of the past attempts at clinical research. These difficulties are essentially of two natures. In the first instance, is the question of acceptable and reliable diagnoses based upon sufficient laboratory studies and made with the aid of all the best and accepted diagnostic procedures. In such manner must diagnoses be made to be of value statistically. This is a greater problem in the records from men in the field who are not in close touch with hospital facilities. Many such records prove practically worthless because they lack this supportive evidence. In the second instance is the problem of securing adequate and satisfactorily kept records. Outside of our institutions it is rare to find case records containing sufficient data for critical research study.

The responsibility of the practitioner in the field does not stop when he has cared for his patients. He must assume the added burden of so keeping records of

*(Concluded on page 177)*

## MUSIC

BENJAMIN SHARLIP, *Director of Music.*

IN THE early part of the school year 1931-32, a musical seed was sown for the first time at P. C. O. It was the happy inspiration of our own Dr. Long. And it was destined to be richly fertile soil. Conceived with the idea that Music, the universal language and voice of Beauty, was an all important factor in the mental, emotional, and spiritual development of young men and women, a call was issued for those interested in organizing an orchestra. About fifteen willing and enthusiastic students responded.

It is doubtful if ever an embryo group was assailed by greater difficulties. Lack of time was most disheartening—clinics, late classes, outside jobs, of necessity came first. A dearth of instruments, facilities, music, and orchestral experience, did not ease matters any. Yet an indomitable spirit and burning desire to create, inspired by the beauty of music itself, kept the budding organization alive.

There could of course be no concert the first year. The orchestra was simply not yet of age. But the seed had been well planted,—and the next year bore fruit.

From a group of fifteen, the orchestra grew to almost double its size. With the exception of one or two instruments of minor importance, the orchestra was complete. The strength of added numbers, a deep conviction in its purpose, plus an enthusiasm that was contagion itself, soon was manifested in the vast improvement of its playing. So much so that at the end of the season a formal program was presented in the school auditorium, which included the Schubert "Unfinished Symphony" and the "Peer Gynt" Suite of Grieg, taxing works for any symphony orchestra. This concert which also included groups by the string section of the orchestra, and our male vocal quartet was a thrilling success from every standpoint.

This year, our third, has seen a still further growth of our activities. With the vocal quartet as a nucleus, a male glee club was formed which now includes twenty members. The orchestra, enhanced by a fine reputation based on last year's concert and an equally successful one given the past Christmas has also grown and is now a full-fledged and thriving symphony orchestra. Both organizations are now components of the recently formed "Musical Society of P. C. O.," governed by a constitution and by-laws, and self sustaining insofar as expenses for music, instrument repairs and the like, are concerned, thru a small weekly fee. At the end of this season the Musical Society will present a program of even more ambitious proportions than the one given last year.

It should be a source of great pride to P. C. O. to know that close to fifteen per cent of its entire student body is actively engaged in the creation of music and enjoying the unquestionable benefits thereof; also that there are but few professional schools, if any at all, that can boast of either a symphony orchestra or a glee club.

The entire College,—officials, faculty, and students, are to be congratulated on a notable achievement.

## PROGRAM—MAY 5, 1933

- I. MARCH ..... *J. S. Bach*  
 II. ALLEGRETTO FROM "MOONLIGHT SONATA"..... *L. Van Beethoven*  
 III. BERCEUSE ..... *F. A. Long*  
 IV. GAVOTTE..... *C. Gluck*

STRING ENSEMBLE

- V. SYMPHONY IN B MINOR, "UNFINISHED"..... *F. Schubert*  
 Allegro moderato  
 Andante con moto

ORCHESTRA

- VI. THE DREAMY LAKE..... *R. Schumann*  
 VII. THE INDIAN SERENADE..... *W. Berwald*  
 Words of Shelley  
 VIII. THE WINTER SONG..... *F. Bullard*

MALE QUARTET

- IX. "PEER GYNT SUITE"..... *E. Grieg*  
 1. The Morning  
 2. Ase's Death  
 3. Anitra's Dance  
 4. In the Hall of the Mountain King

ORCHESTRA

(The string ensemble is composed of members of the string sections of the orchestra)

## CONCERT—DECEMBER 18, 1933

- OVERTURE, "Coriolan"..... *L. Van Beethoven*

ORCHESTRA

- WIEGENLIED..... *J. Brahms*

TWO NEGRO SPIRITUALS

GLEE CLUB

SUITE OF CLASSIC DANCES:

- I. Sarabande..... *F. Couperin (1668-1733)*  
 II. Bourree ..... *J. Krebs (1713-1780)*  
 III. Air..... *C. von Gluck (1714-1787)*  
 IV. Gavotte ..... *A. Gretry (1741-1813)*  
 V. Minuet..... *J. Matheson (1681-1764)*  
 VI. Rigaudon ..... *J. Rameau (1683-1764)*

ORCHESTRA

## ALMA MATER

*Hail, Alma Mater, dear,  
To thee our love declare;  
To us be ever near  
Through all the years.  
Help us thy truth to see;  
Teach us staunch sons to be,  
Striving continually,  
P. C. O. for thee.*

*When we depart from thee,  
Serving where need we see,  
Strengthen our loyalty,  
Our trust in thee.  
Guide us in all aright;  
Give us through wisdom, sight;  
Grant us to ever fight,  
P. C. O. for thee.*

*And when our work complete,  
Our course on earth is ceased,  
Judge us thy sons and me  
Our task well done.  
Increase from day to day,  
Daughters and sons, we pray,  
To serve and live for thee,  
P. C. O. for thee.*

DR. W. M. HAMILTON '25.

## A SKIN ON THE SHEEP IS WORTH THREE IN COLLEGE

BY RUSSELL C. ERM

OH, WHAT is so rare as a day in June? Our answer is porter-house steak and any day in July, August and September.

June is the month of June bugs, June brides and June Commencements. It is remarkable that they all fall in the same class. It is a commencement for everything—the bugs and the brides.

It is a warm Saturday morning in June. The first Saturday, in fact. It is commencement morning at P.C.O. Although only 10 o'clock, friends and relatives of the victims are filing into College Hall. They think the program will start at 11 o'clock.

I said it is a warm morning, one of those days that require only pants under the graduation gowns. Of course, we're speaking of men now.

Seniors are pacing to and fro and fro and to. In fact, they're coming and going—but all gowned in flowing black cloth and decked with tasselled plaster boards. It's a pretty site—the campus out doors.

The faculty is arriving in installments. In green and yellow hoods. Pretty flowers, there!

Now and then we look into the auditorium. It is steaming with humanity. The women fan and the men shift from side to side. Ushers are flitting up and down the aisles while the visitors sit where they please.

The college orchestra is waiting in the pit. Being osteopaths they are "boning" over their notes. The violinists are stringing their instruments. The corsetist blows out one "ba"—his neighbor "tuba." And so it goes while they wait for the signal to start.

At last the faculty is dressed and the Seniors are not far behind—in fact a couple of them are ahead of the faculty in their nervousness.

Someone waves a sleeve of a gown as a signal—and they're off. Not the gown but the academic procession. What a glorious sight. The robin hides behind the laurel bush. He's mortified.

Out they march along the front of the college and up the steps to the auditorium. Some step on their gowns and pull off their collars. They are not accustomed to what the well "dressed" man is wearing.

And now they're on the stage and the

Seniors are pacing down the aisles. The orchestra has gone through their selection three times and it looks like a fourth down.

And now the first test, the invocation. Whether to take off their caps or not, that is the question. It's over and 50 per cent still are wearing caps. They feel flustered and take them off just as the others are putting theirs on again.

It's now 90 in the shade and 98 in the auditorium. The janitor evidently has gotten up the steam he started in February. It's weakening. Even the plants are potted. When the faculty gets awake the oration is over and the "last roll call" is being made. This is the Mae West signal of "come up and see me."

As the names are called, the Seniors one by one come on the stage for the coveted diploma. Some fall up, some knock over the potted plants 'cause they "fern" through such exercises before.

Each Senior is awarded a diploma in his left hand and has his right hand shaken by the Dean. The left-handed students shake the diploma and are given the Dean as an award.

The applause is vociferous for the first dozen students. Gradually it gets weaker

until the applause for the last Senior amounts to a roll call of his family present.

Flowers are carried forward for the girl graduates. The orchestra thinks it's an ovation for them and strikes up the Alma Mater.

This is another test. The faculty move their lips and hunt for the words on the program and the Seniors mumble to themselves. Other students present take it as a cue to leave—for safety's sake at least.

And now comes the exit march. It sounds much like the opening number but it's too hot to differentiate clearly.

Who is to leave first? The faculty waits for the Seniors and the Seniors wait for the faculty. The ferns are sprucing up—they know it won't be long. Finally everybody turns around to their neighbor and says "Well?" The Professor of Romance Language tears off his perspiration-soaked gown and blushes as he remembers he left off his shirt. And everyone looks for an exit. Commencement is over.

*Moral:* It is not only the sheep that gets skinned in June.

or

If one sheep is one ba—are two sheep tuba?

## HUMOR SECTION

C.—“Every time I kiss you it makes me a better man.”

P.—“Well, you don't have to try to get to heaven all in one night.”

“Got a Sweetheart yet, Miss A——?”

“Yes, and he's a regular gentleman.”

“You don't say so!”

“Yes, he took me to a restaurant last night and poured tea into his sancer to cool it: but he didn't blow it like common people do—he fanned it with his hat.”

Hotel Keeper—“I have rooms for fifty and seventy-five cents a night.”

Guest—“What's the difference between them?”

Hotel Keeper—“Not much, only the seventy-five cent ones have rat traps.”

We hear that a Nudist was expelled at camp the last cold day for cheating. He was caught wearing a coat of frost.

The English language is a funny thing. Tell a girl that time stands still as you gaze into her eyes, and she'll adore you. But just see what happens when you say her face would stop a clock.

Among the recently sterilized Germans, we suspect the latest wise crack might be “Wanna buy a duet?”

Class June, 1934

"The only difference between you and a  
horse is that a horse wears a collar."

"Well, I wear a collar."

"Then there isn't any difference at all."

Prof. to Frosh in Embr. Lab.—"Know  
how to tell a he bird from a she bird?"

Frosh—"Nope. Give up."

Prof.—"Pull its tail. If he chirps, it's  
a he bird. If she chirps it's a she bird."

The following advertisement appeared  
in a Western newspaper: "If the party  
who took the jar out of the back of my  
car last Saturday, will return my wife's  
appendix, they may keep the alcohol."

Father—"You must do something to  
become famous, my lad. You must have  
some kind of inspiration. Just think of  
Colonel Lindbergh's wonderful feat."

Son—"Yes, and Charlie Chaplin's too."

Have you heard the one about the man  
who throttled his wife? Some choke, eh  
Boss?

Did you hear the one about the fellow  
who hitch-hiked his way across the  
country? Thumb joke, eh Boss?

T.—"Gotta match?"

M.—"Sure."

T.—"Gimme a cigarette."

M.—"Want me to light it for ya?"

T.—"If you don't mind."

M.—"How ya fixed for spittin'?"

The fortunate young man was giving  
a prenuptial interview to the reporters.

"After our marriage," he stated, "we  
will reside at the old Manse."

And the hard boiled reporter wrote:  
"When the couple return from their  
honeymoon, they will reside with the  
groom's parents."

THE PHILADELPHIA COLLEGE OF

# OSTEOPATHY

**E**ACH student beginning the regular four year course in this institution in September, 1934, must have credit for one year of acceptable Pre-osteopathic College work in addition to an approved four year high school course.

Such credit may be earned by attendance at a recognized college. However, students having high school credit only will be enrolled as members of a Pre-osteopathic class for a one year course in the Philadelphia College of Osteopathy preparatory to the regular work in osteopathic training.

Such a Pre-osteopathic course, especially if obtained in an osteopathic institution, is an ideal arrangement for the completion of a student's preparation.

## FIRST AID

Album: a book in which photographs are  
pasted.

Anesthesia: the name of one of the late  
Czar of Russia's daughters.

Aseptic: a fellow who will not believe  
anything even after you have proved  
it to him; a person who is sure of only  
one thing: that he is in doubt.

Chill: name of the girl who tumbled after  
the boy who went up the hill to fetch  
a pail of water.

Compass: an instrument used by sailors  
so they will not lose their way on the  
ocean.

Fracture: part of a whole, like  $\frac{3}{4}$ .

Gash: money in copper, nickel, silver, and  
bills, but not checks.

Ligature: all kinds of writing, like essays,  
novels, dramas, especially when they  
are distinguished by their artistic  
quality.

Menthol: anything pertaining to the mind.

Nurse: conglomeration of unpleasant  
sounds; confusion, din, bedlam.

Relapse: to sit back or lie down in a com-  
fortable position and to think some-  
thing pleasant or nothing at all, thereby  
relieving both body and mind from  
strain.

Rupture: extreme joy or pleasure;  
ecstasy; what one looks upon a beauti-  
ful woman with.

Shock: a big fish with huge, sharp teeth  
that can bit off a person's leg.

Wound: vernacular contraction of "will  
not."

mooth working combination that nite and from the very start of the game grabbed a lead which they never relinquished through the remainder of the fracas. Martin Schnoll, who had recently gone on a scoring spree continued to shoot baskets from all angles and when the final gun sounded there were 11 markers next to his name.

In their closing game of the season the Osteopaths engaged the Elizabethtown quintet in a return contest and once again showed their supremacy by defeating the visitors by the score of 30-26. It was necessary for the maroon and gray to put on a last-minute rally to emerge victors but they had the punch to withstand the assault of the upstaters. Bill Furey, pivot ace on Coach McWilliams' team, led the team in scoring, garnering 9 points.

At the conclusion of the final game, Martin Schnoll, high scoring forward, was elected to lead the osteopaths for the 1934-1935 season. In addition to Schnoll, the following men will return next year: Bill Furey, Bob Cooper, Elias Korn, Bill Maciejewski, Dick Jamison, Arthur Bunting, George Hylander and Speer. Only Nikola, retiring captain, will be lost to the team due to graduation.

## OSTEOPATHY AND RESEARCH

(Continued from page 158)

procedures, his cases, and his findings that he may in part enrich the heritage upon which future generations might build greater institutions of healing just in the same measure that he benefited by the knowledge gained by those who went before him. To fail to supply this information in a form in which it is of value is fundamentally selfish and spells retrogression for osteopathy. To supply such information is to make available for those whose duty it is to study them a body of facts the value of which the average individual practitioner is not fully aware. In the aggregate such well kept records supply information with which osteopathic principles can be more fully unfolded and with which they can be presented to the questioning scientific world in a manner which must command acceptance of their basic truthfulness.

## ACKNOWLEDGMENTS

THE Staff of the 1934 "Synopsis" wish to express their deep and sincere appreciation to the many who have helped make this volume possible through their co-operation and diligence.

Especially do we wish to acknowledge the aid given this publication by those who reserved space for advertisements. May we suggest that our readers keep these friends of the "Synopsis" in mind? Without them the issue would be impossible.

We thank Dr. D'Eliscu and Dr. Green of the Faculty for their co-operation. We thank Dr. Holden, Prof. Erb, Dr. Dressler, and Dr. Long for their interesting articles. We thank our photographers—Zamsky Studios, Inc., and our publishers—Westbrook Publishing Company, especially Mr. Dwight Barnes, for their contributions to the book's success. Also Ben Menin of Menin Displays.

Miss Palmer, Mrs. Merkle, Miss Proud, Miss Good, and Miss Campbell of the office staff, please accept our thanks.

Among the students we appreciate especially the work of Joseph Porias, Martha Bailey, John Finn, Ida Schmidt, Glen Cole, Ralph Farquhar, Murray Miller, John Dawson, Franklin Lindley, Elizabeth Peck, and Harry Mintzer.

The Editor especially wants to express his most profound thanks to the members of the Staff who spent so many hours in the preparation of the book.

All the art work in this book was done by Jacob Levin. He reserves the rights to all drawings.
